Intel is a registered trademark of Intel Corporation.

Pentium and Pentium II/III are trademarks of Intel Corporation.

Other brand and product names are trademarks and/or registered trademarks of their respective holders.

## Trademarks

LiteOn is a registered trademark of LiteOn Technology Corp.

All other trademarks are property of their respective owners.

## Conventions

The following conventions are used in this manual:

Screen messages	Denotes actual messages that appear on screen.
NOTE	Gives bits and pieces of additional information related to the current topic.
WARNING	Alerts you to any damage that might result from doing or not doing specific actions.
CAUTION	Gives precautionary measures to avoid possible hardware or software problems.
IMPORTANT	Remind you to do specific actions relevant to the accomplishment of procedures.

---

## Preface

Before using this information and the product it supports, please read the following general information.

1. This Service Guide provides you with all technical information relating to the BASIC CONFIGURATION decided for Acer's "global" product offering. To better fit local market requirements and enhance product competitiveness, your regional office may have decided to extend the functionality of a machine (e.g. add-on card, modem, or extra memory capability). These LOCALIZED FEATURES will NOT be covered in this generic service guide. In such cases, please contact your regional offices or the responsible personnel/channel to provide you with further technical details.
2. Please note WHEN ORDERING FRU PARTS, that you should check the most up-to-date information available on your regional web or channel. If, for whatever reason, a part number change is made, it will not be noted in the printed Service Guide. For ACER-AUTHORIZED SERVICE PROVIDERS, your Acer office may have a DIFFERENT part number code to those given in the FRU list of this printed Service Guide. You MUST use the list provided by your regional Acer office to order FRU parts for repair and service of customer machines.

## Warning: (For FCC Certified Models)

**Note:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

1. Reorient or relocate the receiving antenna.
2. Increase the separation between the equipment and receiver.
3. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
4. Consult the dealer or an experienced radio/TV technician for help.

## Notice:

1. The changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
2. Shielded interface cables and AC power cord, if any, must be used in order to comply with the emission limits.
3. The manufacturer is not responsible for any radio or TV interference caused by unauthorized modification to this equipment. It is the responsibility of the user to correct such interference.

As ENERGY STAR® Partner our company has determined that this product meets the ENERGY STAR® guidelines for energy efficiency.

## Warning:

To prevent fire or shock hazard, do not expose the monitor to rain or moisture. Dangerous high voltages are present inside the monitor. Do not open the cabinet. Refer servicing to qualified personnel only.

## Precautions

- Do not use the monitor near water, e.g. near a bathtub, washbowl, kitchen sink, laundry tub, swimming pool or in a wet basement.
- Do not place the monitor on an unstable trolley, stand, or table. If the monitor falls, it can injure a person and cause serious damage to the appliance. Use only a trolley or stand recommended by the manufacturer or sold with the monitor. If you mount the monitor on a wall or shelf, use a mounting kit approved by the manufacturer and follow the kit instructions.
- Slots and openings in the back and bottom of the cabinet are provided for ventilation. To ensure reliable operation of the monitor and to protect it from overheating, be sure these openings are not blocked or covered. Do not place the monitor on a bed, sofa, rug, or similar surface. Do not place the monitor near or over a radiator or heat register. Do not place the monitor in a bookcase or cabinet unless proper ventilation is provided.
- The monitor should be operated only from the type of power source indicated on the label. If you are not sure of the type of power supplied to your home, consult your dealer or local power company.
- The monitor is equipped with a three-pronged grounded plug, a plug with a third (grounding) pin. This plug will fit only into a grounded power outlet as a safety feature. If your outlet does not accommodate the three-wire plug, have an electrician install the correct outlet, or use an adapter to ground the appliance safely. Do not defeat the safety purpose of the grounded plug.
- Unplug the unit during a lightning storm or when it will not be used for long periods of time. This will protect the monitor from damage due to power surges.
- Do not overload power strips and extension cords. Overloading can result in fire or electric shock.
- Never push any object into the slot on the monitor cabinet. It could short circuit parts causing a fire or electric shock. Never spill liquids on the monitor.
- Do not attempt to service the monitor yourself; opening or removing covers can expose you to dangerous voltages and other hazards. Please refer all servicing to qualified service personnel
- To ensure satisfactory operation, use the monitor only with UL listed computers which have appropriate configured receptacles marked between 100 - 240V AC, Min. 5A.
- The wall socket shall be installed near the equipment and shall be easily accessible.

## Special Notes On LCD Monitors

The following symptoms are normal with LCD monitor and do not indicate a problem.

## Notes

- Due to the nature of the fluorescent light, the screen may flicker during initial use. Turn off the Power Switch and then turn it on again to make sure the flicker disappears.
- You may find slightly uneven brightness on the screen depending on the desktop pattern you use.
- The LCD screen has effective pixels of 99.99% or more. It may include blemishes of 0.01% or less such as a missing pixel or a pixel lit all of the time.
- Due to the nature of the LCD screen, an afterimage of the previous screen may remain after switching the image, when the same image is displayed for hours. In this case, the screen is recovered slowly by changing the image or turning off the Power Switch for hours.

**Introduction****Scope**

This specification defines the requirements for the 19" MICROPROCESSOR based Multi-mode supported high resolution color LCD monitor. This monitor can be directly connected to general 15 pin D-sub VGA connector. It also supports VESA DPMS power management and plug & play function. There is a build-in stereo audio amplifier with OSD control to drive a pair of speakers.

**Description**

The LCD monitor is designed with the latest LCD technology to provide a performance oriented product with no radiation. This will alleviate the growing health concerns. It is also a space saving design, allowing more desktop space, and comparing to the traditional CRT monitor, it consumes less power and gets less weight in addition MTBF target is 50k hours or more.

## Electrical Requirements

### Standard Test Conditions

All tests shall be performed under the following conditions, unless otherwise specified.

<b>Ambient light</b>		225 lux
<b>Viewing distance</b>		40 cm in front of LCD panel
<b>Warm up time</b>	All specifications	30 minutes
	Fully functional	5 seconds
<b>Measuring equipment</b>		Chroma 7120 signal generator or equivalent, directly Connected to the monitor under test.
<b>Control settings</b>	User brightness control	Maximum (unless otherwise specified)
	User contrast control	Typical (unless otherwise specified)
	User red/white balance, Green/white balance and Blue/white balance control	In the center (unless otherwise specified)
<b>Power input</b>		100Vac or 264Vac
<b>Ambient temperature</b>		20±5
<b>Analog input mode</b>		1280 x1024 /75 Hz
<b>Measurement systems</b>		<p>The units of measure stated in this document are listed below:</p> <p>1 gamma = 1 nano tesla  1 tesla = 10,000 gauss  cm = in x 2.54  lb = kg x 2.2  degrees F = [°C x 1.8] + 32  degrees C = [°F - 32]/1.8  <math>u' = 4x/(-2x + 12y + 3)</math>  <math>v' = 9y/(-2x + 12y + 3)</math>  <math>x = (27u'/4)/[(9u'/2) - 12v' + 9]</math>  <math>y = (3v')/[(9u'/2) - 12v' + 9]</math>  Nits = cd/(m<sup>2</sup>) = Ft-L x 3.426  lux = foot-candle x 10.76</p>

## LCD Monitor General Specification

<b><u>Panel type</u></b>	19 " active matrix color TFT LCD
	AU M190EN04
<b><u>Display size</u></b>	376.32mm (H) × 301.06mm(V)
<b><u>Display mode</u></b>	VGA 640 × 480 (60/75 Hz)
	SVGA 800 × 600 (60/75 Hz)
	XGA 1024 × 768 (60/70/75 Hz)
	SXGA 1280 × 1024 (60/75 Hz)
<b><u>Pixel pitch</u></b>	0.294mm(H) × 0.294mm(V)
<b><u>Display dot</u></b>	1280 x (RGB) × 1024
<b><u>Pixel clock</u></b>	135MHz(max.)
<b><u>Contrast ratio</u></b>	550:1(typ.)
<b><u>Brightness</u></b>	270 cd/m <sup>2</sup> (typ.)
<b><u>Response time (Tr+Tf)</u></b>	8ms(Typ.)
<b><u>Display color</u></b>	16.2M(6-bits+FRC)
<b><u>Viewing angle</u></b>	H: 140 / V: 135 (typ.)
<b><u>Pc interface</u></b>	RGB Analog Interface
<b><u>Signal connector</u></b>	D-Sub 15pin
<b><u>Interface frequency</u></b>	Horizontal Frequency 30KHz ----80KHz
	Vertical Frequency 55Hz -----75Hz
<b><u>Plug &amp; play</u></b>	VESA DDC2B
<b><u>Power Input voltage</u></b>	47-63HZ, 100 VAC to 264VAC ±10%
<b><u>Total output power</u></b>	60Watt(max.)

## LCD Panel Specification

### LCD Panel Model (AU M190EN04)

- Display Type                    active matrix color TFT LCD
- Resolution                    1280x1024 pixels
- Display Dot                    1280x (RGB) x 1024
- Display Area                   376.32mm(H) x 301.06mm(V)
- Pixel Pitch                    0.294mm(H) x 0.294mm(V)
- Display Color                16.2M (true)
- Lamp Frequency              50kHz(Max.)
- Lamp Current                7.0 mArms (typ.)
- Weight                        2700g (typ.)

### Optical Specifications

Measuring Condition: Ta = 25°C.

Item	Unit	Conditions	Min.	Typ.	Max.	Note
Viewing Angle	[degree]	Horizontal (Right)	65	70	-	
	[degree]	CR = 10 (Left)	65	70	-	
	[degree]	Vertical (Up)	70	75	-	
	[degree]	CR = 10 (Down)	55	60	-	
Contrast ratio		Normal Direction	350	550		
Response Time	[msec]	Raising Time	-	5.6	8.4	<i>Note 1</i>
	[msec]	Falling Time	-	2.4	3.6	<i>Note 1</i>
	[msec]	Rising + Falling	-	8	12	<i>Note 1,2</i>
Color / Chromaticity Coordinates (CIE)		Red x	0.604	0.634	0.664	
		Red y	0.324	0.354	0.384	
		Green x	0.257	0.287	0.317	
		Green y	0.591	0.621	0.651	
		Blue x	0.108	0.138	0.168	
		Blue y	0.047	0.077	0.107	
Color Coordinates (CIE) White		White x	0.283	0.313	0.343	
		White y	0.299	0.329	0.359	
White Luminance at CCFL 7.0mA (central point)	[cd/m <sup>2</sup> ]		215	270	-	
Luminance Uniformity	[%]		70	75	-	<i>Note 3</i>
Crosstalk (in75Hz)	[%]				1.5	<i>Note 4</i>
Flicker	DB				-20	<i>Note 5</i>

## Supported Timing

STANDARD		RESOLUTION	HORIZONTAL FREQUENCY(kHz)	VERTICAL FREQUENCY(Hz)
VESA	VGA	640 × 480	31.469	59.940
		640 × 480	37.500	75.000
	SVGA	800 × 600	37.879	60.317
		800 × 600	46.875	75.000
	XGA	1024 × 768	48.363	60.004
		1024 × 768	56.476	70.069
		1024 × 768	60.023	75.029
	SXGA	1280 × 1024	64.000	60.000
		1280 × 1024	80.000	75.000
	IBM	DOS	720 × 400	31.469
MAC	XGA	1024 × 768	48.780	60.001
		1024 × 768	60.241	74.927

## Support Modes

There will be 20 total support modes to accommodate the above mode and other video modes within the frequency range of the monitor.

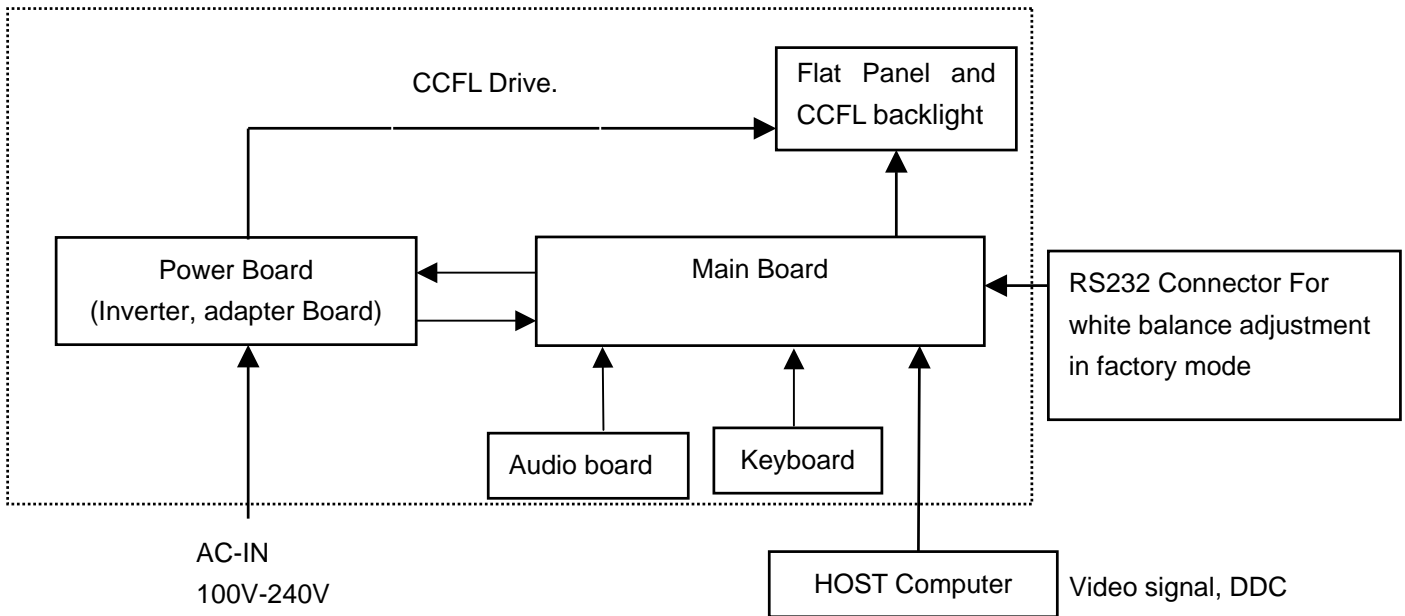

## 85Hz refresh rate Support

Monitor should display 85Hz refresh rate mode as emergency mode. Monitor should display “ Out of Range” warning menu at this mode.

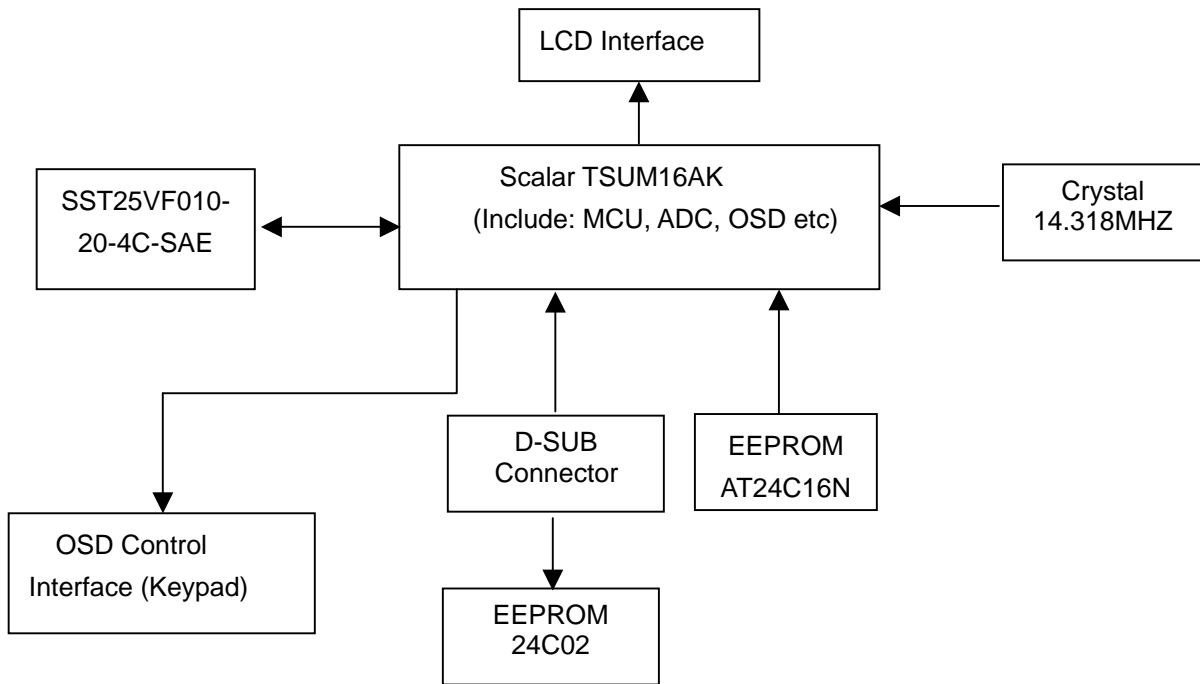

## Monitor Block Diagram

The LCD MONITOR will contain a main board, a power board, keypad board and audio board which house the flat panel control logic, brightness control logic and DDC.

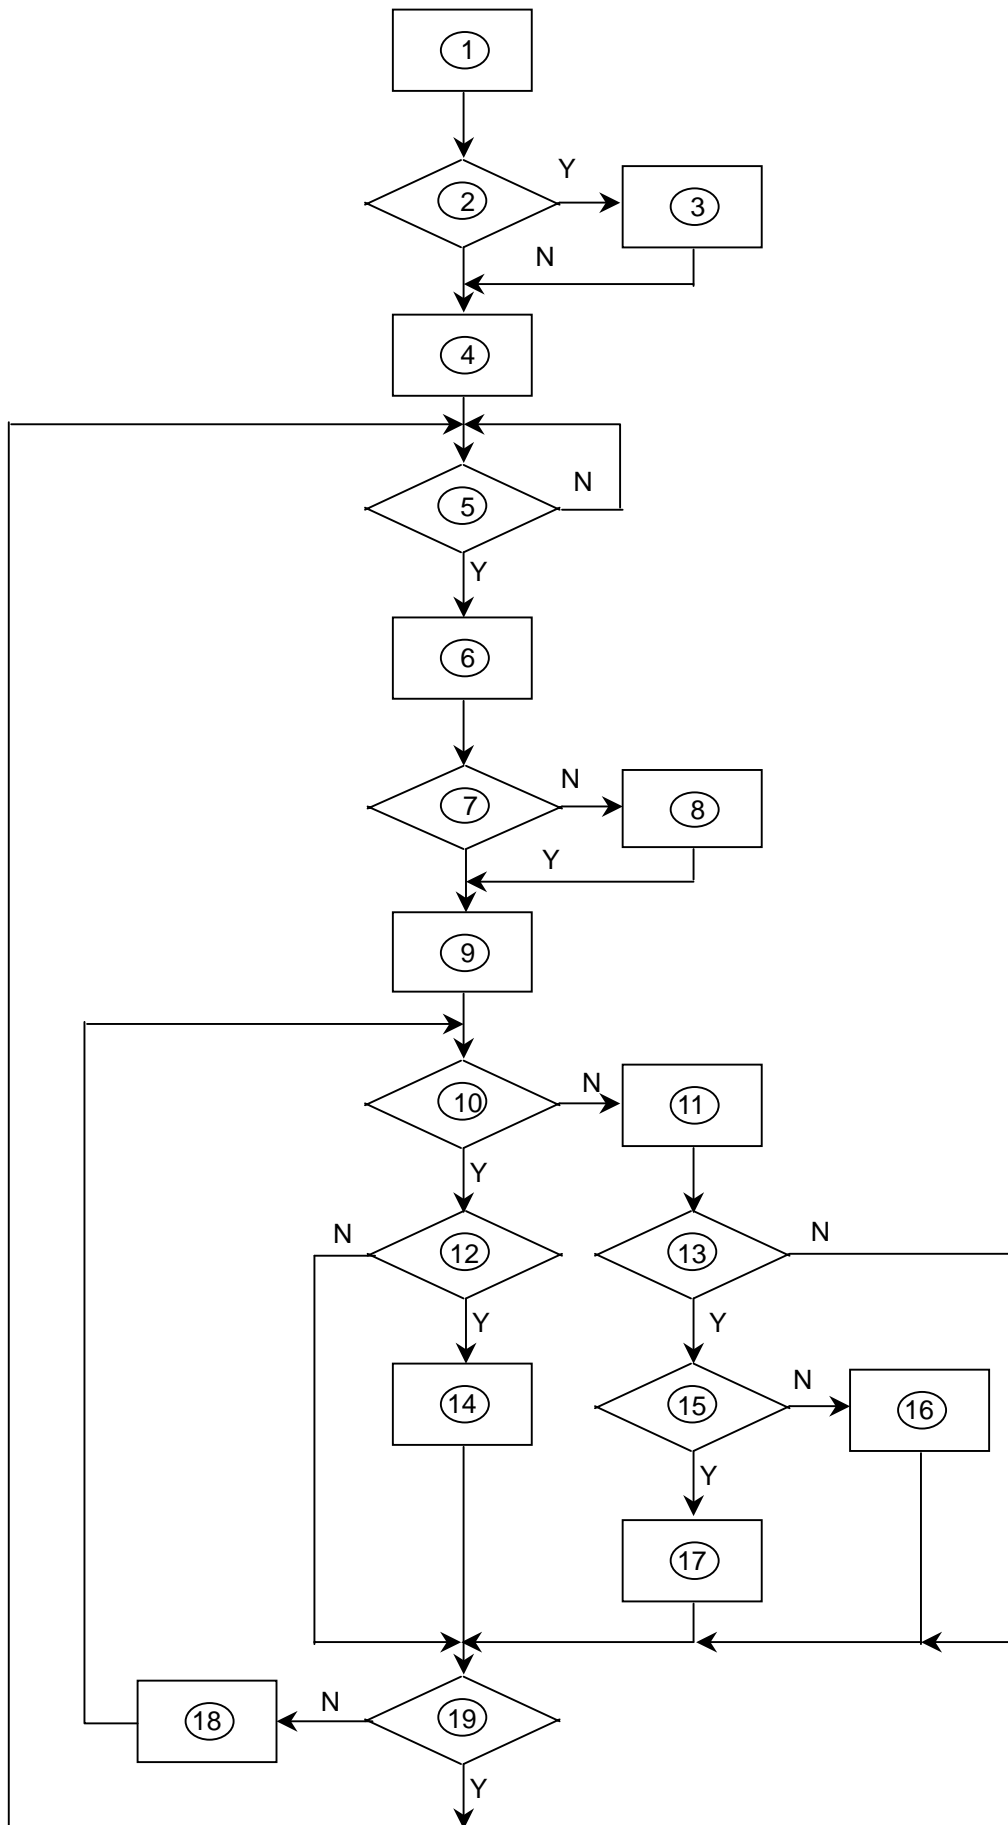

The Inverter board will drive the backlight of panel.

## Main Board Diagram

# Software Flow Chart

**Remark:**

1) MCU initializes.
2) Is the EEPROM blank?
3) Program the EEPROM by default values.
4) Get the PWM value of brightness from EEPROM.
5) Is the power key pressed?
6) Clear all global flags.
7) Are the AUTO and SELECT keys pressed?
8) Enter factory mode.
9) Save the power key status into EEPROM. Turn on the LED and set it to green color. Scalar initializes.
10) In standby mode?
11) Update the lifetime of back light.
12) Check the analog port, are there any signals coming?
13) Does the scalar send out an interrupt request?
14) Wake up the scalar.
15) Are there any signals coming from analog port?
16) Display "No connection Check Signal Cable" message. And go into standby mode after the message disappears.
17) Program the scalar to be able to show the coming mode.
18) Process the OSD display.
19) Read the keyboard. Is the power key pressed?

# Main Board Layout

Label	Part number	Description
CN405	88G 35315F H	D-SUB 15PIN
CN101	33G801724B H	PIN HEADER 24P 2.0mm
U401	56G 562100	TSUM16AK
X401	93G 22 53	CRYSTAL 14.318MHzHC-49U

## Front Bezel

Press the power button to turn the monitor on or off. The other control buttons are located at front panel of the monitor. By changing these settings, the picture can be adjusted to your personal preferences.

- The power cord should be connected.
- Connect the video cable from the monitor to the video card.
- Press the power button to turn on the monitor position, The power indicator will light up.

## EXTERNAL CONTROLS FRONT PANEL CONTROL

Item	Description	Item	Description
1.	Auto Adjust / Exit	4.	MENU/ENTER
2.	<	5.	Power Indicator
3.	>	6.	Power Button

---

## Rear Bezel

Turn off your computer before performing the procedure below.

1. Plug the power cable of your monitor into a nearby outlet. Plug the other end of the power cord into the PC port.
2. Connector one end of 15-pin D-SUB cable to the back of the monitor and connector the other end to the computer's D-DUB port.

Turn on your monitor and computer.

Item	Description
1.	Power Cable
2.	Signal Cable

## Operating Instructions

Press the power button to turn the monitor on or off. The other control buttons are located at front panel of the monitor. By changing these settings, the picture can be adjusted to your personal preferences.

- The power cord should be connected.
- Connect the video cable from the monitor to the video card.
- Press the power button to turn on the monitor position. The power indicator will light up.

## External Controls

Item	Description	Item	Description
1.	Auto Adjust / Exit	4.	MENU/ENTER
2.	<	5.	Power Indicator
3.	>	6.	Power Button

---

## Front Panel Control

- **⏻/Power Button:**  
Press this button to turn the monitor ON or OFF. And display the monitor's state.
  
- **Power Indicator:**  
Green – Power on mode.  
Orange – Off mode.
  
- **Menu / Enter:**  
Activate OSD menu when OSD is OFF or activate/de-activate adjustment function when OSD is ON or Exit OSD menu when in Volume Adjust OSD status.
  
- **<:**  
Negative through adjustment icons when OSD is ON or adjust a function when function is activated.
  
- **>:**  
Navigate through adjustment icons when OSD is ON or adjust a function when function is activated.
  
- **Auto Adjust button / Exit:**
  1. When OSD menu is in active status, this button will act as EXIT-KEY (EXIT OSD menu).
  2. When OSD menu is in off status, press this button for 2 seconds to activate the Auto Adjustment function.  
The Auto Adjustment function is used to set the HPos, VPos, Clock and Focus.

## NOTES

- Do not install the monitor in a location near heat sources such as radiators or air ducts, or in a place subject to direct sunlight, or excessive dust or mechanical vibration or shock.
- Save the original shipping carton and packing materials, as they will come in handy if you ever have to ship your monitor.
- For maximum protection, repackage your monitor as it was originally packed at the factory.
- To keep the monitor looking new, periodically clean it with a soft cloth. Stubborn stains may be removed with a cloth lightly dampened with a mild detergent solution. Never use strong solvents such as thinner, benzene, or abrasive cleaners, since these will damage the cabinet. As a safety precaution, always unplug the monitor before cleaning it.

## Adjusting the Picture

### a. How to Adjust a Setting

1. Press the MENU-button to activate the OSD window.
2. Press < or > to select the desired function.
3. Press the MENU-button to select the function that you want to adjust.
4. Press < or > to change the settings of the current function.
5. To exit and save, select the exit function. If you want to adjust any other function, repeat steps 2-4.

Analog-Only Mode

## b. The Description For Control Function

Main Menu Icon	Sub Menu Item	Sub Menu Icon	Description
	Contrast		Contrast from Digital-register.
	Brightness		Backlight Adjustment
	Focus		Adjust Picture Phase to reduce Horizontal-Line noise
	Clock		Adjust picture Clock to reduce Vertical-Line noise.
	H. Position		Adjust the horizontal position of the picture.
	V. Position		Adjust the vertical position of the picture.
	Warm	N/A	Recall Warm Color Temperature from EEPROM.
	Cool	N/A	Recall Cool Color Temperature from EEPROM.
	User / Red		Red Gain from Digital-register.
	User/ Green		Green Gain Digital-register.
	User / Blue		Blue Gain from Digital-register.
	English	N/A	Set OSD display language to English.
	Traditional Chinese	N/A	Set OSD display language to Traditional Chinese.
	Deutsch	N/A	Set OSD display language to German.
	Français	N/A	Set OSD display language to French.
	Español	N/A	Set OSD display language to Spain.
	Italiano	N/A	Set OSD display language to Italian.
	Simplified Chinese	N/A	Set OSD display language to Simplified Chinese.
	Japanese	N/A	Set OSD display language to Japanese.
	H. Position		Adjust the horizontal position of the OSD.
	V. Position		Adjust the vertical position of the OSD.
	OSD Timeout		Adjust the OSD timeout.

Main Menu Icon	Sub Menu Item	Sub Menu Icon	Description
 (Analog-Only Model)	Auto Config	N/A	Auto Adjust the H/V Position, Focus and Clock of picture.
	Information	N/A	Show the resolution, H/V frequency and input port of current input timing.
	Reset	N/A	Clear each old status of Auto-configuration and set the color temperature to Cool.
	Exit	N/A	Exit OSD

## Hot-Key Menu

### a. Outline

### b. The Description For Hot-Key Function

Item	Operation	Icon	Description
Volume	When the OSD is closed, press Left or Right button will be Volume Hot-Key Function		Volume of Audio adjustment. The Audio will be Mute when volume=0

## OSD Message

### a. Outline

### b. The Description For OSD Message

Item	Description
Auto Config Please Wait	When Analog signal input, if User Press Hot-Key "Auto", will show This message, and the monitor do the auto config function.
Input Not Supported	When the Hsync Frequency, Vsync Frequency or Resolution is out of The monitor support range will show this message. This message will Be flying.
Cable Not Connected	Analog-Only Model: When the video cable is not connected, will show This message. This message will be flying.
No Signal	Analog-Only Model: When the video cable is connected, but there is No active signal input, will show this message, then enter power saving.

## Logo

When the monitor is power on, the LOGO will be showed in the center, and disappear slowly.

## How To Optimize The DOS-Mode

### Plug And Play

### Plug & Play DDC2B Feature

This monitor is equipped with VESA DDC2B capabilities according to the VESA DDC STANDARD. It allows the monitor to inform the host system of its identity and, depending on the level of DDC used, communicate additional information about its display capabilities.

The DDC2B is a bi-directional data channel based on the I<sup>2</sup>C protocol. The host can request EDID information over the DDC2B channel.

**This monitor will appear to be non-functional if there is no video input signal. In order for this monitor to operate properly, there must be a video input signal.**

This monitor meets the Green monitor standards as set by the Video Electronics Standards Association (VESA) and/or the United States Environmental Protection Agency (EPA) and The Swedish Confederation Employees (NUTEK). This feature is designed to conserve electrical energy by reducing power consumption when there is no video-input signal present. When there is no video input signals this monitor, following a time-out period, will automatically switch to an OFF mode. This reduces the monitor's internal power supply consumption. After the video input signal is restored, full power is restored and the display is automatically redrawn. The appearance is similar to a "Screen Saver" feature except the display is completely off. The display is restored by pressing a key on the keyboard, or clicking the mouse.

### Using The Right Power Cord

The accessory power cord for the Northern American region is the wallet plug with NEMA 5-15 style and is UL listed and CSA labeled. The voltage rating for the power cord shall be 125 volts AC.

Supplied with units intended for connection to power outlet of personal computer: Please use a cord set consisting of a minimum No. 18 AWG, type SJT or SVT three conductors flexible cord. One end terminates with a grounding type attachment plug, rated 10A, 250V, CEE-22 male configuration. The other end terminates with a molded-on type connector body, rated 10A, 250V, having standard CEE-22 female configuration.

Please note that power supply cord needs to use VDE 0602, 0625, 0821 approval power cord in European counties.

This chapter contains step-by-step procedures on how to assemble the monitor for maintenance.

## Disassembly Procedure

### Disassemble the base

1. Remove hinge cover. (Fig 1)
2. Remove four screws to release stand base. (Fig 2)

Fig 1

Fig 2

### Disassemble the front cover and rear bezel

1. Remove nine screws to release back cover and front bezel. (Fig 3)
2. Remove connector wire with keyboard and main board. (Fig 4)

Fig 3

Fig 4

---

## Disassemble the shield

Remove two screws to release the shield. (Fig 5)

(Remove the shield as arrow direction).

Fig 5

## Disassemble the main board

1. Remove three screws to release main board. (Fig 6)
2. Remove connector wire with main board and panel. (Fig 7)

Fig 6

Fig 7

3. Remove connector wire with main board and power board. (Fig 8)
4. Remove connector wire with main board and KEPC board. (Fig 9)

Fig 8

Fig 9

## Disassemble the power board

1. Remove four screws to release power board. (Fig 10)
2. Remove connector wire with power board and panel. (Fig 11)

Fig 10

Fig 11

---

## Disassemble the panel

Remove four screws to release metal frame. (Fig 12)

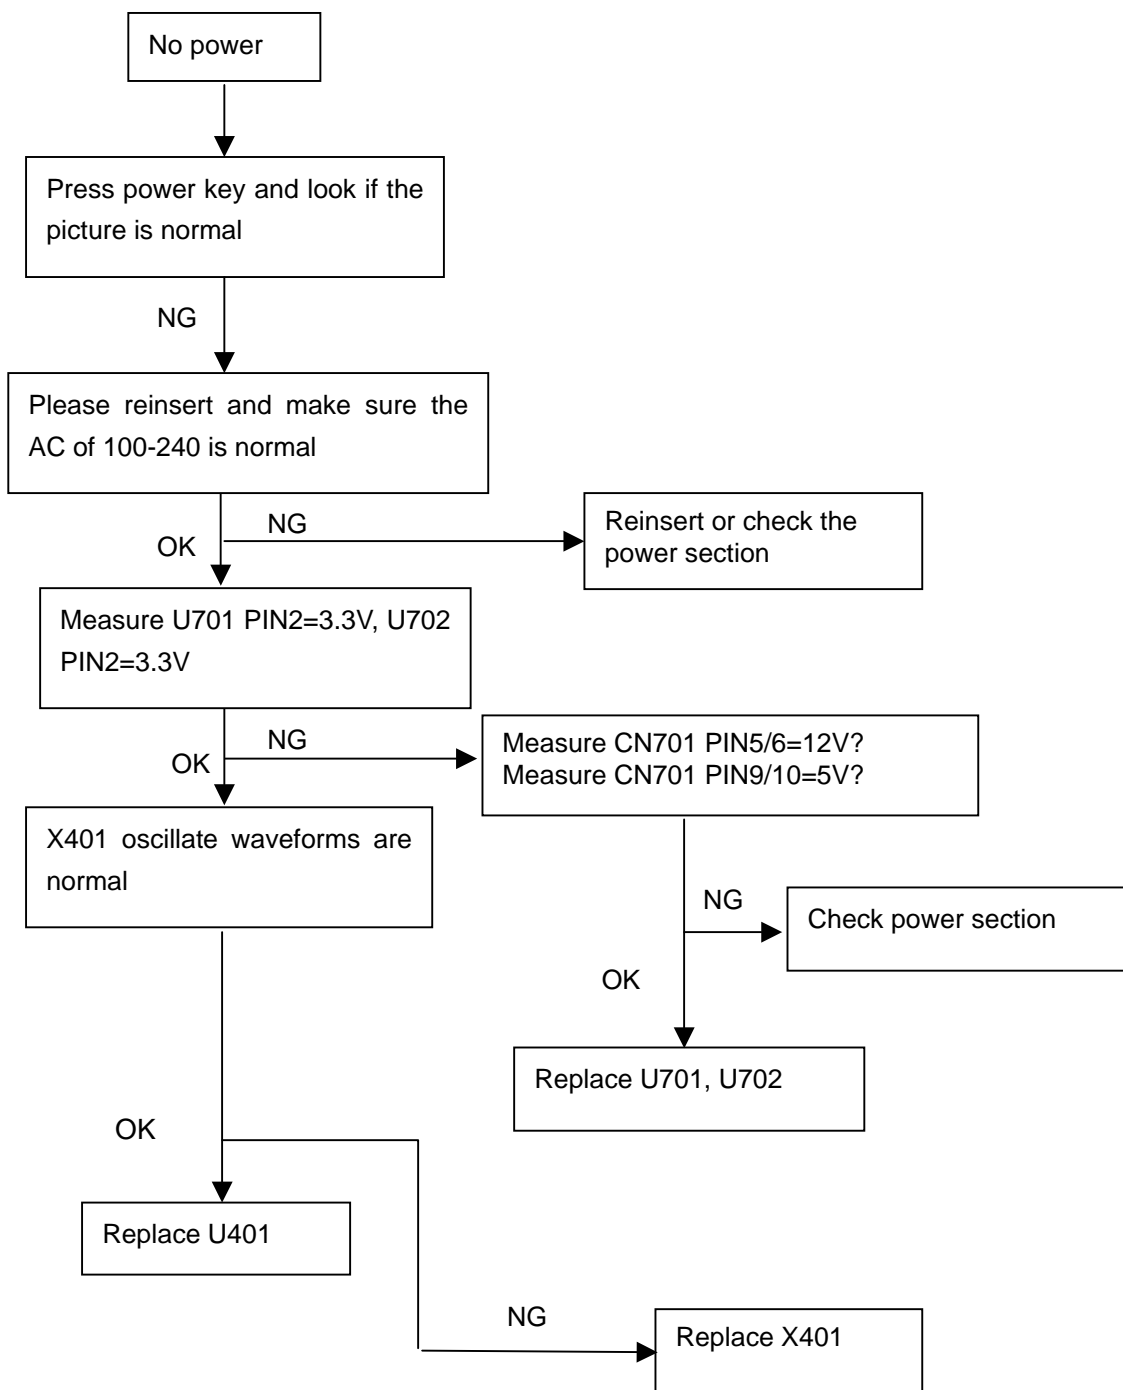

Fig 12

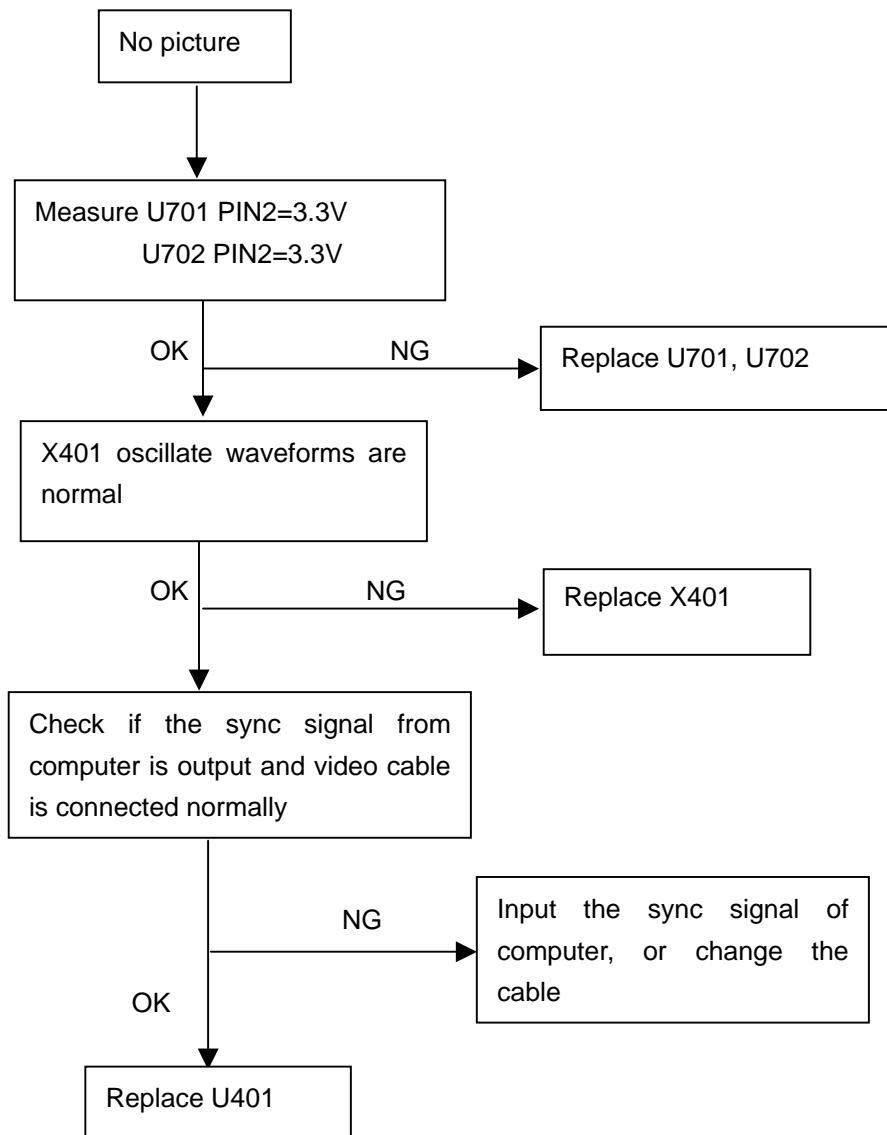

This chapter provides troubleshooting information for the AL1916:

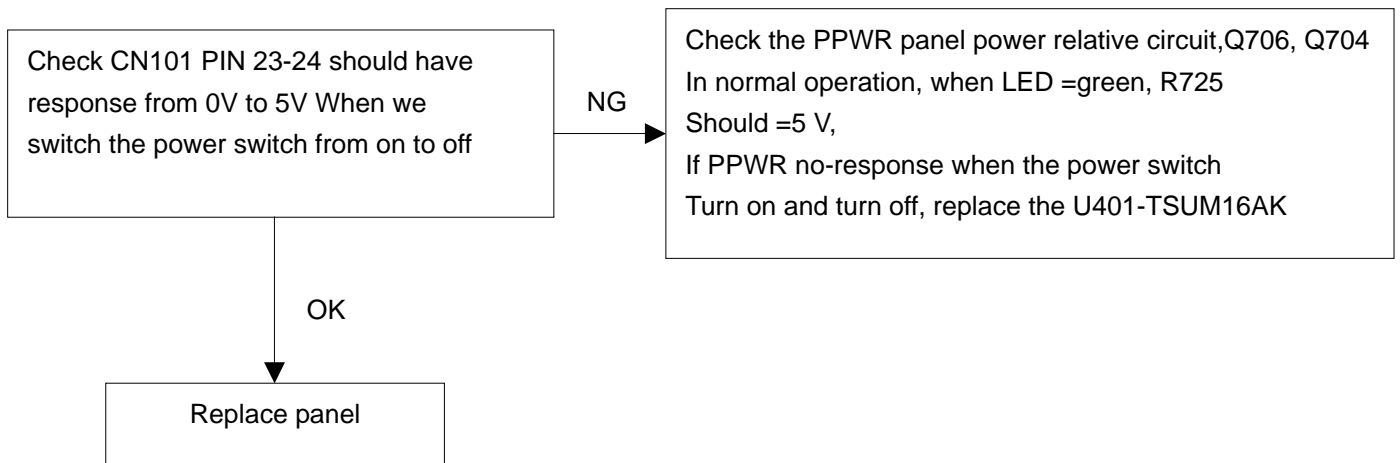

1. No power

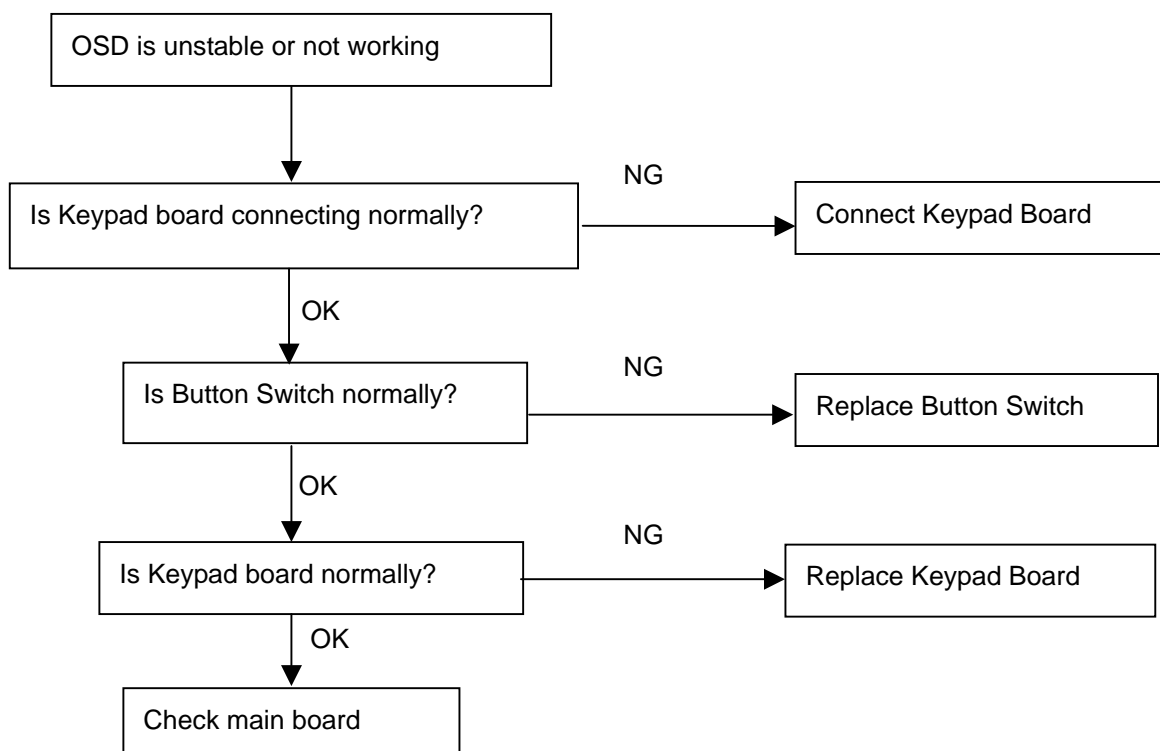

## 2. No picture (LED is orange)

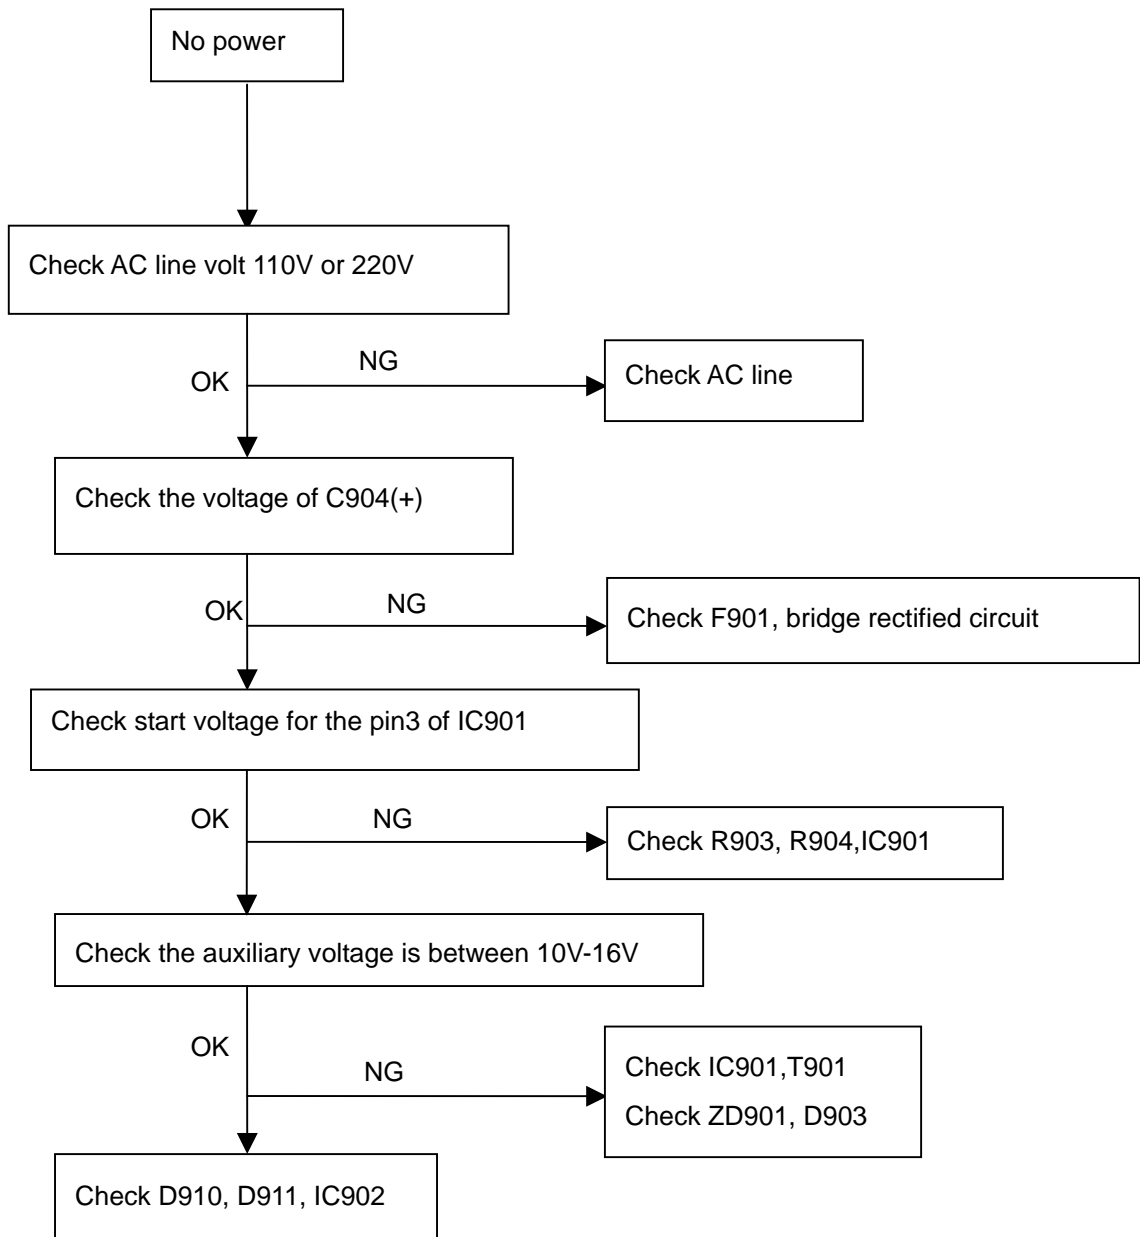

### 3. Panel Power Circuit

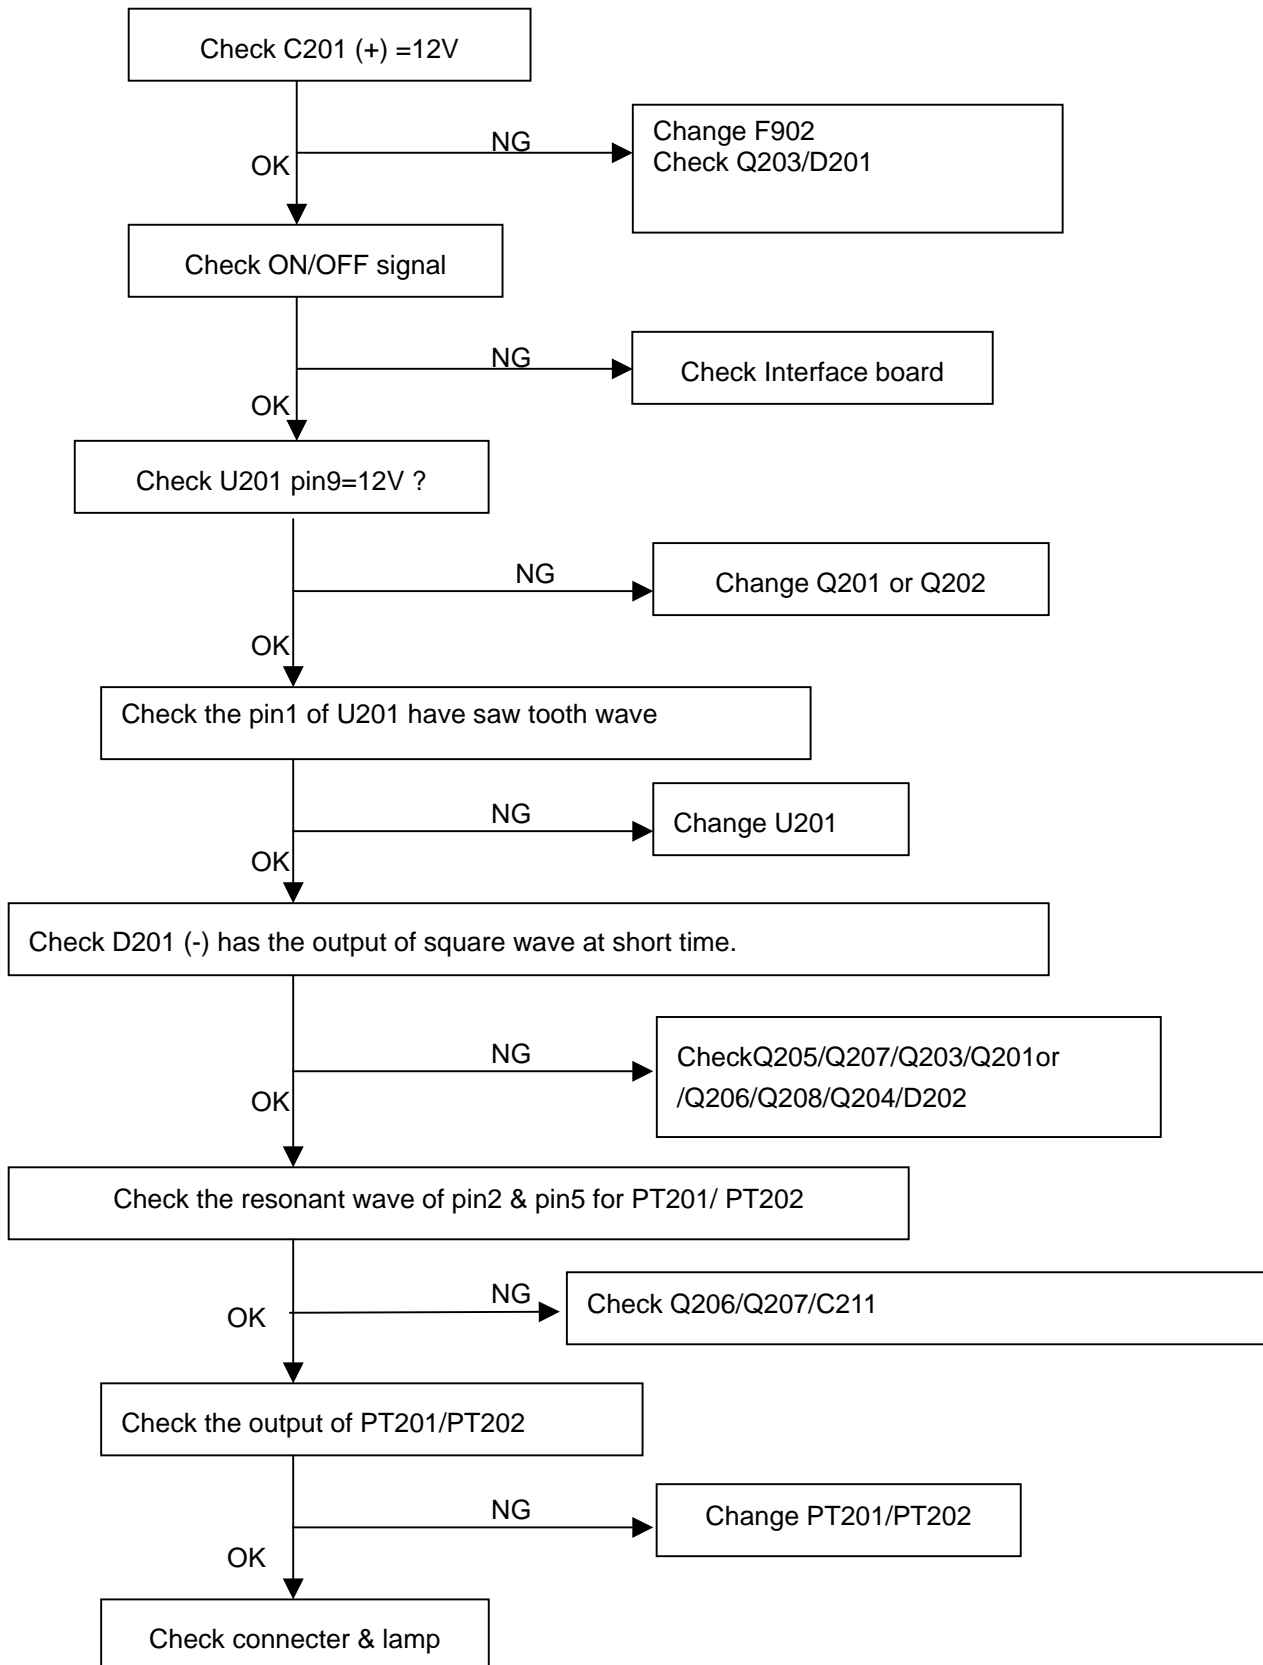

### 4. Keypad Board

5. PWPC  
No Power

## No Backlight

The following figure shows the connector locations on the monitor board:

15 – Pin Color Display Signal Cable (D-sub)

<b>PIN NO.</b>	<b>DESCRIPTION</b>	<b>PI N NO.</b>	<b>DESCRIPTION</b>
1.	Red	9.	+5V
2.	Green	10.	Logic Ground
3.	Blue	11.	Monitor Ground
4.	Monitor Ground	12.	DDC-Serial Data
5.	DDC-Return	13.	H-Sync
6.	R-Ground	14.	V-Sync
7.	G-Ground	15.	DDC-Serial Clock
8.	B-Ground		

This chapter gives you the FRU (Field Replaceable Unit) listing in global configurations of AL1916. Refer to this chapter whenever ordering for parts to repair or for RMA (Return Merchandise Authorization).

**NOTE:** Please note WHEN ORDERING FRU PARTS, that you should check the most up-to-date information available on your regional web or channel (<http://aicsl.acer.com.tw/spl/>). For whatever reasons a part number change is made, it will not be noted in the printed Service Guide. For ACER AUTHORIZED SERVICE PROVIDERS, your Acer office may have a DIFFERENT part number code from those given in the FRU list of this printed Service Guide. You MUST use the local FRU list provided by your regional Acer office to order FRU parts for repair and service of customer machines.

**NOTE:** To scrap or to return the defective parts, you should follow the local government ordinance or regulations on how to dispose it properly, or follow the rules set by your regional Acer office on how to return it.

# Power

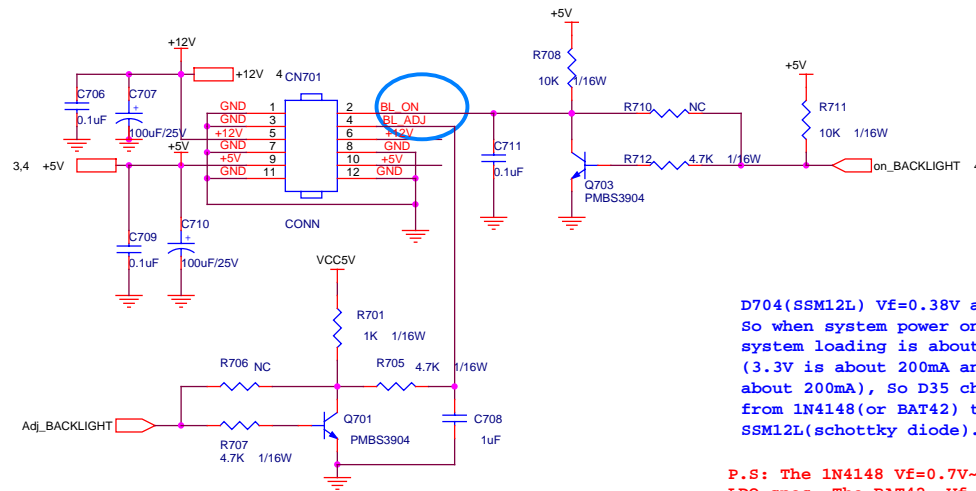

BL_ADJ(DC)	R31	C51	R32	R29	R33	Q4
0V ~ 3.3V	4.7K	10uF	0	X	X	X
0V ~ 5V	4.7K	10uF	X	1K	4.7K	MMBT3904

BL_Adj	R31	C32
P W	47	NC
D C	4K7	1uF

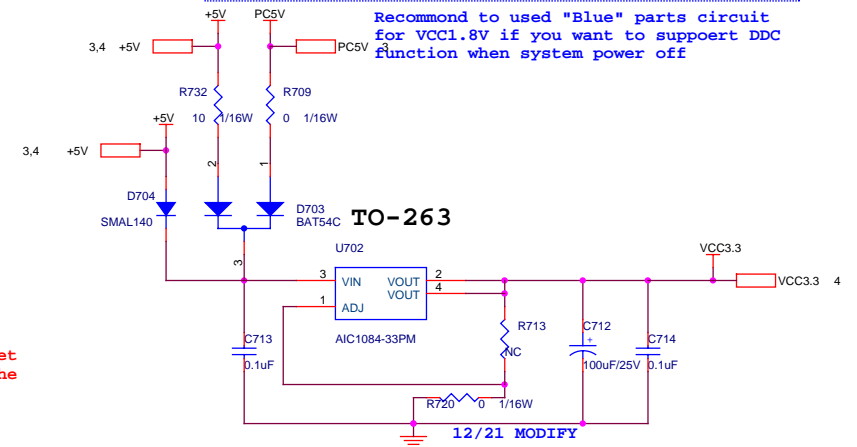

Recommend to use "Blue" parts circuit for VCC1.8V if you want to support DDC function when system power off

D704(SSM12L) Vf=0.38V and If=1A. So when system power on, the system loading is about 400mA (3.3V is about 200mA and 1.8V is about 200mA), So D35 changed from 1N4148(or BAT42) to SSM12L(schottky diode).

P.S: The 1N4148 Vf=0.7V-1V can't meet LDO spec. The BAT42, Vf is OK but the If=200mA(forward current) can not meet current spec.

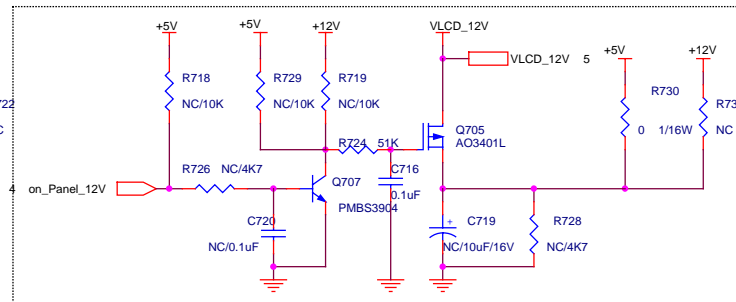

TO-263

12/21 MODIFY

For RSDS and Panel VCC=12V
