

Panasonic LUCI ADAPTOR

This LUCI Adaptor is for use with the Panasonic LUCI Interface and can be used on the following models :- Z7, Euro 1, Euro 2, Euro 3, Euro 4, and Euro 5.

Please follow these instructions carefully.

The diagram below (Fig.1.) shows the solder side of the adaptor, please note that it shows which side has to be connected into the service socket on the television chassis.

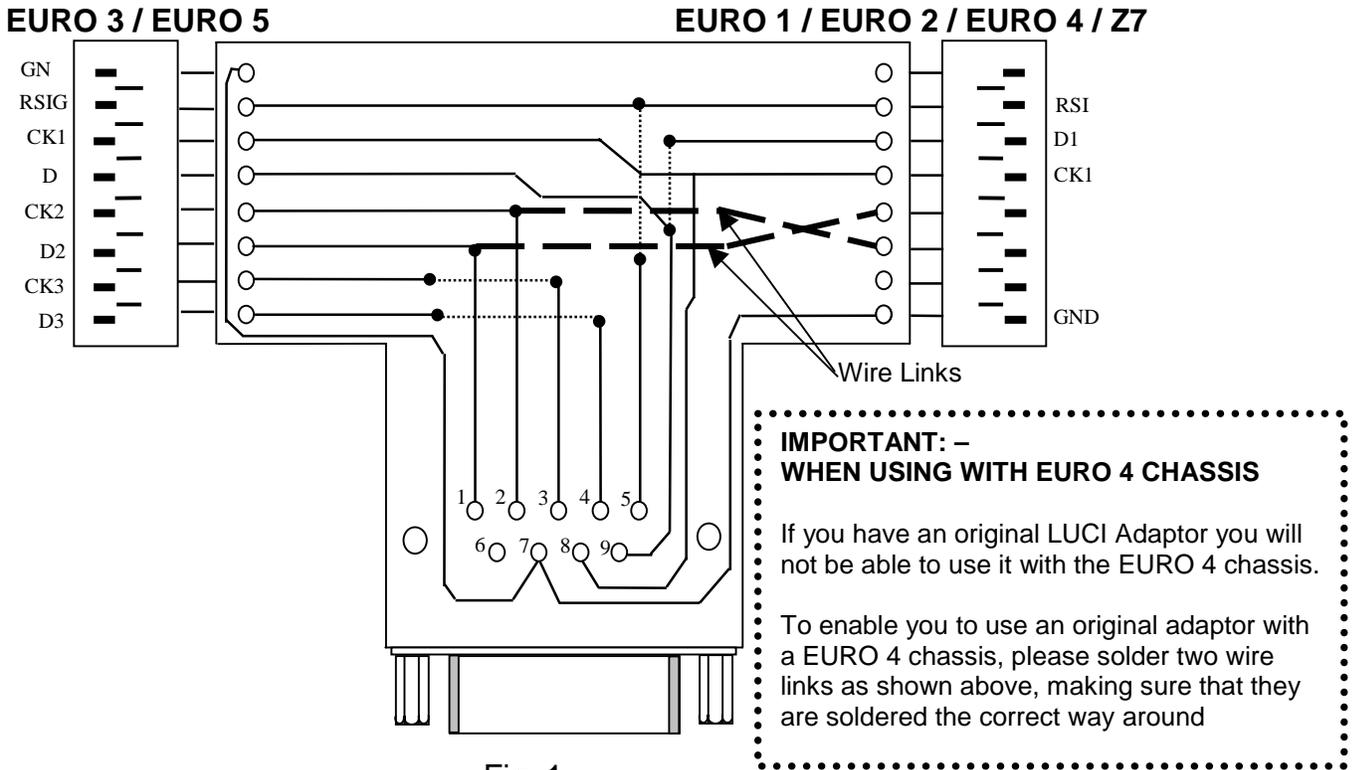

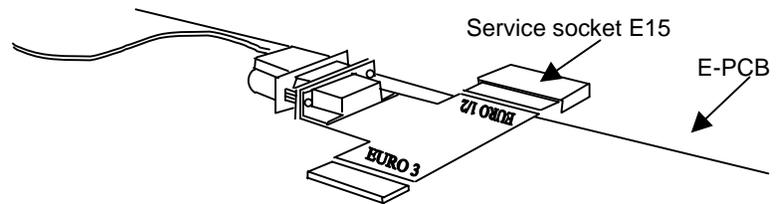

Fig. 1.

Before connecting to the chosen chassis please make sure that the TV is switched OFF

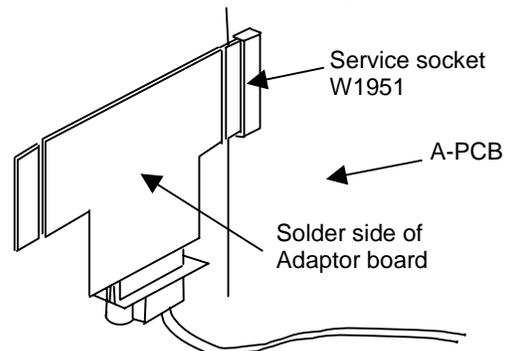

Z7

1. Connect the lead from the LUCI Interface to the RS232 connector on the adaptor.
2. Connect the side marked EURO 1/2 on the LUCI adaptor to the TV service socket.

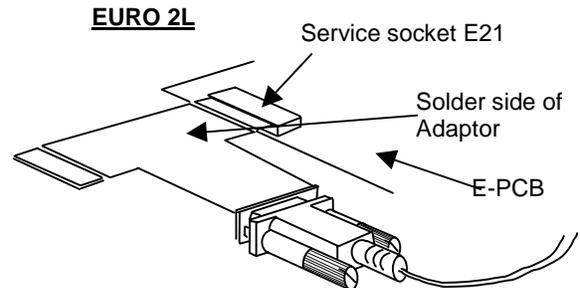

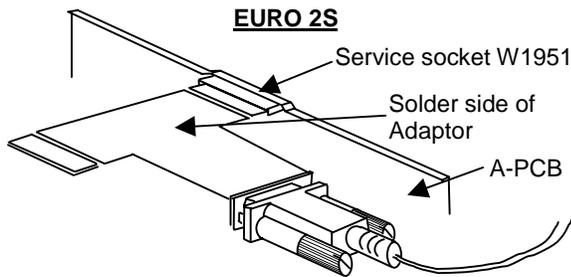

EURO 1.

1. Connect the lead from the LUCI Interface to the RS232 connector on the adaptor.
2. Connect the side marked EURO 1/2 on the LUCI adaptor to the TV service socket making sure that the RS232 socket on the LUCI adaptor is facing downwards.

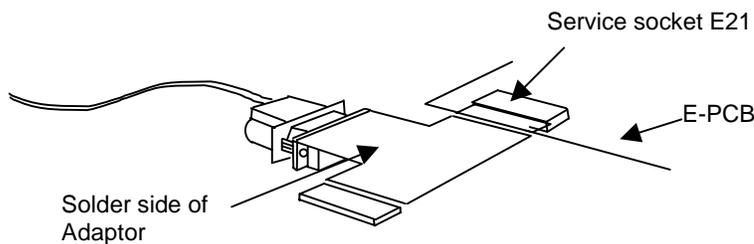

EURO 2S / EURO 2L

1. Connect the lead from the LUCI Interface to the RS232 connector on the adaptor.
2. Turn the LUCI adaptor through 180° so the solder side is facing upwards, connect the adaptor plug marked EURO 1/2 to the TV service socket.

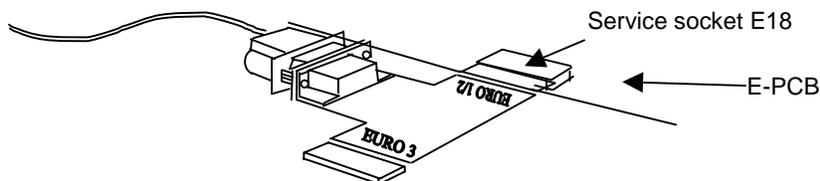

EURO 3

1. Connect the lead from the LUCI Interface to the RS232 connector on the adaptor.
2. Turn the LUCI adaptor through 180° so the solder side is facing upwards, connect the adaptor plug marked EURO 3 to the TV service socket.

EURO 4

1. Connect the lead from the LUCI Interface to the RS232 connector on the adaptor.
2. Connect the side marked EURO 1/2 on the LUCI adaptor to the TV service socket.

EURO 5

3. Connect the lead from the LUCI Interface to the RS232 connector on the adaptor.
4. Turn the LUCI adaptor through 180° so the solder side is facing upwards, connect the adaptor plug marked EURO 3 to the TV service socket.
