

It is necessary to enter the Service Mode in order to carry out alignment of the TV set. Most adjustments can be made with the RCU, except the Focus and Screen voltages.

1. Service Mode Access

Important : The Service Mode cannot be entered if any equipment is connected to the Scart socket, i.e. pin 8 switching voltage present.

- 1.1 With the RCU, switch the TV set into the "Standby" mode.
- 1.2 Switch "Off" the TV set by mains supply switch (wait until LED is dark).
- 1.3 Whilst depressing the RCU "Blue (VT)" button, switch "On" the TV set using the mains supply switch.
- 1.4 Release and press once again the RCU "Blue (VT)" button, the following "Set-Up" menu should be displayed."

Adjustment menu selection bar :
1 to 4 lines displayed which can be selected by keys 1 to 4 on the remote control.

| Character | Setting |
|-----------|----------------------------|
| T | Text board build in |
| TT | Top-Text board build in |
| N | Nicam board build in |
| M | Mono sound is build in |
| P | Picture Signal Improvement |

| Character | Setting |
|-----------|----------------------|
| Z | Zoom is build in |
| K | TELEFUNKEN TV set |
| 7 | Subcode 7 enabled |
| I | IR-lock ON |
| D | Dolby board build in |

Three sub-menus can be accessed from the main service mode menu:

- SET-UP** : TV settings
- VIDEO** : Access to video adjustments
- GEOM** : Geometry adjustments

2. Sub-Menu Selection

- 2.1 With the RCU Volume "+" and "-" buttons, highlight the menu containing the function to be aligned.
- 2.2 Press the RCU "Blue (VT)" button : Selection
Press the RCU "↔" button : Selection
to highlight the function to be aligned.

3. Switching between Service and TV modes

3.1 Whilst in the Service Mode, normal TV controls are disabled, to enable these controls whilst in the Service Mode (i.e. for channel changing etc.) press the "TV" button on the RCU. To return to the Service Mode, press the "Blue (VT)" button on the RCU.

4. Alignment and storing new function value

- 4.1 The current value of the selected function is displayed in a hexadecimal form to the right of the function name. This value is adjusted by means of the RCU Volume "+" and "-" buttons.
- 4.2 To STORE the functions new value, highlight **MEMO** and press the RCU Volume "+" button.
- 4.3 To RESTORE the functions original value, highlight **RESTORE** and press the RCU Volume "+" button.
So it's possible to check and here and there without destroying any values unless the store function were executed.
- 4.4 Selecting the ROM functions downloads the production software default values, these are not very accurate and should only be used in very special cases.

5. Leaving the Service Mode

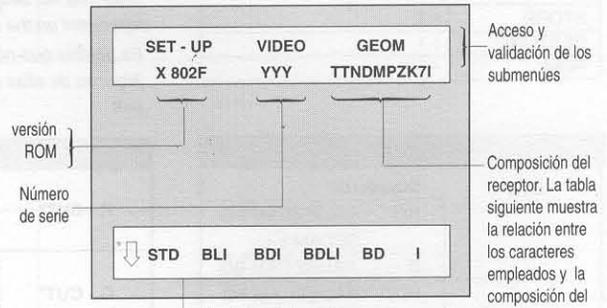

- 5.1 To leave the Service mode either, switch the TV set into "Standby" or switch "Off" the mains supply.

Se necesita el MODO SERVICIO para ajustar el aparato. Todos los ajustes se hacen con el mando a distancia (a excepción de los ajustes del foco y las tensiones de la rejilla de pantalla).

1. Acceso al MODO SERVICIO

Atencion : No se puede conectar el MODO SERVICIO cuando en Eurotoma-AV está activado un aparato, es decir, cuando existe tensión de conexión.

- 1.1 Con el mando a distancia conectar a STANDBY el televisor.
- 1.2 Desconectar el aparato con el interruptor de la red (esperar hasta que el LED se apague).
- 1.3 Mantener pulsada la tecla azul y conectar el aparato simultáneamente con el interruptor de red.
- 1.4 El menú siguiente aparece volviendo a pulsar la tecla azul.

Barra de selección de los ajustes : de una a cuatro líneas visibles, seleccionadas con las teclas 1 a 4 del teclado numérico del telemando.

| Character | Setting |
|-----------|----------------------------|
| T | Text board build in |
| TT | Top-Text board build in |
| N | Nicam board build in |
| M | Mono sound is build in |
| P | Picture Signal Improvement |

| Character | Setting |
|-----------|----------------------|
| Z | Zoom is build in |
| K | TELEFUNKEN TV set |
| 7 | Subcode 7 enabled |
| I | IR-lock ON |
| D | Dolby board build in |

El menú principal del Modo Servicio da acceso a tres submenús:

- SET-UP** : Configuración del televisor
- VIDEO** : Acceso a los ajustes de vídeo
- GEOMETRY** : Ajustes de geometría

2. Selección de submenús

- 2.1 Con las teclas +/- se selecciona el menú correspondiente que "hojea" con la tecla azul.
- 2.2 Pulse el botón "Blue (VT)" del RCU : Selección
Pulse el botón "↔" del RCU : Selection
para encender la función que debe ser alineada.

3. Conmutar entre funcionamiento Servicio y TV

En el MODO SERVICIO las funciones de televisión normales no pueden operarse. Si se necesitan éstas en MODO SERVICIO (p.ej., cambio de programa), con la tecla (TV) puede conmutarse a la operación TV normal.
Pulsando la tecla azul se vuelve al MODO SERVICIO.

4. Ajuste de la función elegida y almacenamiento

El valor momentáneo de la función elegida es indicado de modo hexadecimal a la derecha, al lado de la posición, a ajustar, y puede cambiarse con la tecla + o bien - en el mando a distancia. Los cambios del menú respectivo pueden almacenarse bajo MEMO con la tecla + o bien anular bajo RESTORE.
De esta manera es posible verificar aquí y allá sin destruir ningún valor, a menos que se haya realizado la función archivo.

En el punto de menú ROM se pueden cargar los valores por defecto del software. Sin embargo, son sólo una aproximación basta al ajuste aún a realizar y deben usarse sólo en caso de emergencia.

5. Salir del MODO SERVICIO

- 5.1 Conmute el aparato a STANDBY a fin de salir del MODO SERVICIO o desconectar con el interruptor de la red.
