REC: Set to this position to perform timer recording.
OFF: Set to this position under ordinary conditions (when not using the timer or repeat functions).
PLAY-REPEAT:
Set to this position to perform timer playback. When the switch is set to this position during normal playback, repeat playback of a single tape can be performed.

② **Power switch (POWER ▮ OFF/ ⎓ ON)**
After pressing the switch, the WAIT message will appear in the counter display and the level meter scale will flash for about four seconds (the time necessary for circuitry to stabilize). When the display is flashing, no operating buttons will respond, with the exception of the cassette door OPEN/CLOSE button (⏏). To close the cassette door, do it while the power is turned on.

③ **Function display**

④ **Return button (RETURN)**
This button is used in the normal tape counter mode to fast forward or rewind the tape to a point near the counter reading "0000".

Each time this button is pressed, one of the three modes (Normal tape counter/Timer counter/Remaining time counter) is set in sequence.

⑥ **Counter reset button (COUNTER RESET)**
Reset the counter indication to "0000" in the normal tape counter or the time counter mode.
To indicate the correct time value in the remaining time counter mode, this button must be set in accordance with the tape used.

⑦ **Display off button (DISP OFF)**
Press this button to turn off the function display.

⑧ **DOLBY* NR button/indicators (OFF/B/C/S) (CT-S830S)**
DOLBY* NR button/indicators (OFF/B/C) (CT-S730)
Press to select the Dolby NR system in the following order. The selected indicator lights up.

1.6. PCB PARTS LIST

NOTES:

- Parts marked by "NSP" are generally unavailable because they are not in our Master Spare Parts List.
- The ⚠ mark found on some component parts indicates the importance of the safety factor of the part. Therefore, when replacing, be sure to use parts of identical designation.
- Parts marked by "⊙" are not always kept in stock. Their delivery time may be longer than usual or they may be unavailable.
- When ordering resistors, first convert resistance values into code form as shown in the following examples.

Ex.1 When there are 2 effective digits (any digit apart from 0), such as 560 ohm and 47k ohm (tolerance is shown by J=5%, and K=10%).

560 Ω → 56 × 10^1 → 561 ····· RD1/8PM 5 6 1 J
47k Ω → 47 × 10^3 → 473 ····· RD1/4PS 4 7 3 J
0.5 Ω → 0R5 ····· RN2H 0 R 5 K
1 Ω → 010 ····· RS1P 0 1 0 K

Ex.2 When there are 3 effective digits (such as in high precision metal film resistors).

5.62k Ω → 562 × 10^1 → 5621 ····· RN1/4PC 5 6 2 1 F
