

# TA8859CP

## TV BIAS DISTORTION COMPENSATION IC

The TA8859CP is an IC for TV deflection stage to compensate various horizontal, vertical distortion, with a package of 16 pin DIP, controlled via I<sup>2</sup>C bus.

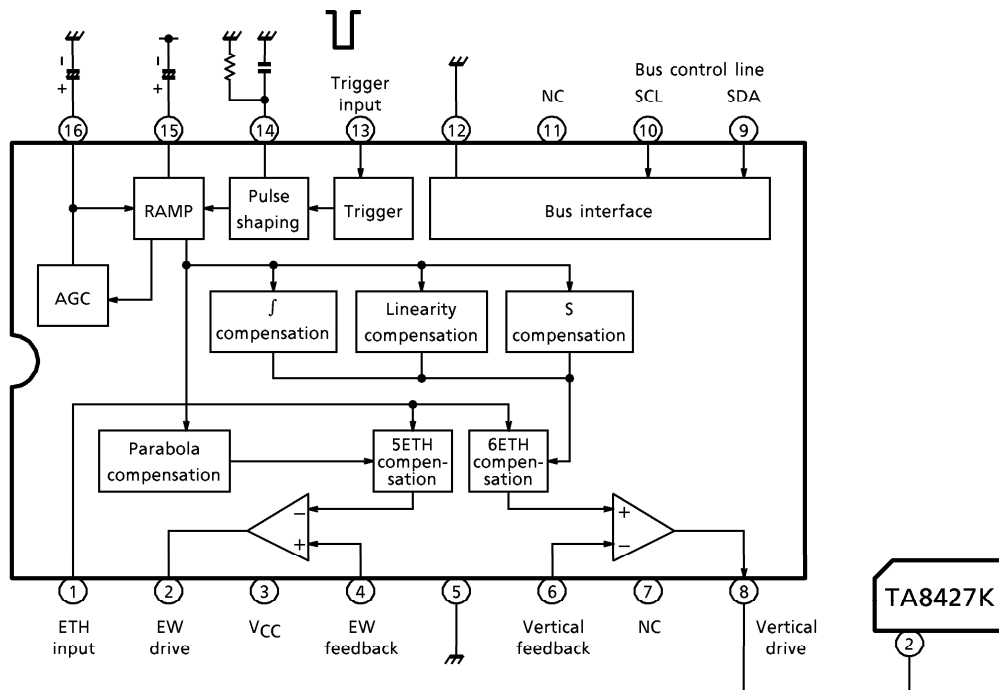

### FEATURES

- Vertical linearity correction
- Vertical S correction
- E-W parabola
- E-W corner
- Trapezium distortion compensation

Weight : 1.11g (Typ.)

### BLOCK DIAGRAM

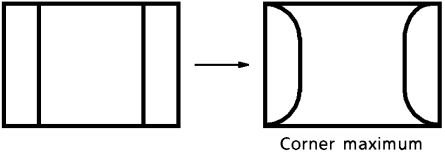

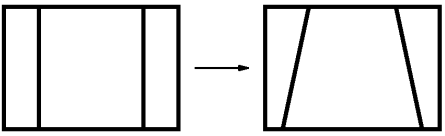

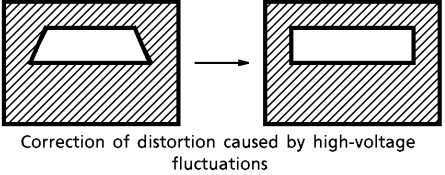

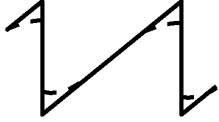

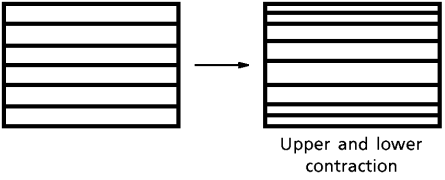

TERMINAL INTERFACE

**OUTLINE OF FUNCTIONS**

FUNCTION	SUB ADDRESS	BIT	OUTPUT WAVEFORM	PICTURE
Picture Height Adjustment	0010	6		
Vertical Linearity correction	0011	5		 Lower expansion upper contraction
Vertical "S" Correction (X <sup>3</sup> )	0100	5		
Vertical Shift	0101	3		 Upper and lower contraction
Vertical Compensation	0110	—		 Correction of distortion caused by high-voltage fluctuations
Picture Width Adjustment	0111	6		
E-W Parabola	1000	6		

FUNCTION	SUB ADDRESS	BIT	OUTPUT WAVEFORM	PICTURE
E-W Corner Correction	1001	4		 <p data-bbox="1281 517 1426 539">Corner maximum</p>
Trapezium Distortion Compensation	1010	6		
Horizontal Compensation	1011	—		 <p data-bbox="1023 898 1426 936">Correction of distortion caused by high-voltage fluctuations</p>
Vertical $f$ Correction (X <sup>5</sup> )	1110	4		 <p data-bbox="1281 1093 1426 1131">Upper and lower contraction</p>

**I<sup>2</sup>C BUS CONTROL FUNCTIONS**

FUNCTION	SUB ADDRESS	DATA	PRESET	RANGE
Picture Height	0000010	x-x-7bit	01000000	-48~48%
V-linearity	0000011	x-x-x-5bit	00010000	-13~13%
V-S Correction	00000100	x-x-x-5bit	00000000	0~22%
V-shift	00000101	x-x-x-AGC-3bit-x	00001000	-800~800mV
V-compensation	00000110	x-x-x-x-4bit	00000000	0~9%
Picture Width	00000111	x-x-6bit	00100000	1.6~7.3V
E-W Parabola	00001000	x-x-6bit	00100000	0~5.6V
E-W Corner	00001001	x-x-x-x-4bit	00000000	0~3.2V
Trapezium	00001010	x-x-6bit	00100000	0~1.2V
H-compensation	00001011	x-x-x-x-4bit	00000000	0~9%
V-f Correction	00001100	x-x-x-x-4bit	00000000	0~4%

- (Note 1) Vertical Height is controlled by Sub Address 02 (H), so no external control is required.
- (Note 2) AGC bit determines vertical AGC response speed.  
 0 : High speed for Channel/Mode change  
 1 : Low speed (1/5×High speed). for Normal reception/Text Mode.
- (Note 3) All registers are cleared into the preset value under the condition of  $V_{CC} \leq 3V$ .

**I<sup>2</sup>C BUS CONTROL FORMAT OUTLINE**

Bus controlled format of TA8859CP is based on I<sup>2</sup>C Bus Control format of PHILIPS.

Data transmission format

(3) Verification response

(4) Slave address

A6	A5	A4	A3	A2	A1	A0	R/W
1	0	0	0	1	1	0	0

Purchase of TOSHIBA I<sup>2</sup>C components conveys a license under the Philips I<sup>2</sup>C Patent Rights to use these components in an I<sup>2</sup>C system, provided that the system conforms to the I<sup>2</sup>C Standard Specification as defined by Philips.

**MAXIMUM RATINGS (Ta = 25°C, VCC = 12V)**

CHARACTERISTIC	SYMBOL	RATING	UNIT
Supply Voltage	V <sub>CC</sub>	15	V
Power Dissipation	P <sub>D max</sub>	1.4 (Note)	W
Input Signal Voltage	e <sub>in</sub>	5	V <sub>p-p</sub>
Operating Temperature	T <sub>opr</sub>	- 20~65	°C
Storage Temperature	T <sub>stg</sub>	- 55~150	°C

(Note) Derated above Ta = 25°C, in the proportion of 11.2mW/°C.

- TOSHIBA is continually working to improve the quality and reliability of its products. Nevertheless, semiconductor devices in general can malfunction or fail due to their inherent electrical sensitivity and vulnerability to physical stress. It is the responsibility of the buyer, when utilizing TOSHIBA products, to comply with the standards of safety in making a safe design for the entire system, and to avoid situations in which a malfunction or failure of such TOSHIBA products could cause loss of human life, bodily injury or damage to property. In developing your designs, please ensure that TOSHIBA products are used within specified operating ranges as set forth in the most recent TOSHIBA products specifications. Also, please keep in mind the precautions and conditions set forth in the "Handling Guide for Semiconductor Devices," or "TOSHIBA Semiconductor Reliability Handbook" etc..
- The TOSHIBA products listed in this document are intended for usage in general electronics applications (computer, personal equipment, office equipment, measuring equipment, industrial robotics, domestic appliances, etc.). These TOSHIBA products are neither intended nor warranted for usage in equipment that requires extraordinarily high quality and/or reliability or a malfunction or failure of which may cause loss of human life or bodily injury ("Unintended Usage"). Unintended Usage include atomic energy control instruments, airplane or spaceship instruments, transportation instruments, traffic signal instruments, combustion control instruments, medical instruments, all types of safety devices, etc.. Unintended Usage of TOSHIBA products listed in this document shall be made at the customer's own risk.
- The products described in this document are subject to the foreign exchange and foreign trade laws.
- The information contained herein is presented only as a guide for the applications of our products. No responsibility is assumed by TOSHIBA CORPORATION for any infringements of intellectual property or other rights of the third parties which may result from its use. No license is granted by implication or otherwise under any intellectual property or other rights of TOSHIBA CORPORATION or others.
- The information contained herein is subject to change without notice.
