

**Autarc-hobs induction with the "Colibri" user interfaces,  
spare part numbers: 357210501/7, 330563074/5, 330563075/2, 330563076/0,  
330563077/8, 330563078/6, 330563079/4, 330 563 072/9, 330 563 073/7**

Problem description /  
error images:

User interface does not work

- Not possible to switch on the appliance, no reaction to touch control sensor fields, display remains dark.
- Not possible to switch „ON“ the cooking zones.
- Not possible to switch „OFF“ the cooking zones.
- The heating modes change automatically without the touch control sensor fields being touched.
- Individual buttons no longer work
- No longer possible to operate the appliance.

Problem solving:

Exchange of the user interface as according to the replacement part documentation.

Short term solution  
for the customers:

In order to ensure the customer can operate their hob until the exchange of the user interface, the voltage can be reset as a short-term problem solution. This means that the hob is to be connected without voltage for at least 5 seconds (Fuse in the house installation switch off). Afterwards the customer can temporarily use the hob without errors.

Attention:

Generally check the serial number when carrying out repair work on the affected hobs (refer to the listing) and additionally replace the input electronics if necessary.

Affected serial numbers: 743.... up to including 821....
