

The diagram is a detailed schematic of a Toshiba V28A00036500 power supply. It features a central transformer (T801) with multiple secondary windings. The circuit includes a full-bridge rectifier (D801-D804) and a power MOSFET (Q801) for switching. Various capacitors (C801-C815) and inductors (L801-L815) are used for filtering and energy storage. The schematic also shows a 250V F4AL fuse (F801) and a 250V F3 15AL T3 15AL fuse (F802). A caution label 'CAUTION LIVE AREA' is present. The diagram is oriented horizontally, with the transformer on the left and the output filter on the right.
