Service Bulletin Computer Monitors

Model: CPD-15SF2, CPD-17SF2

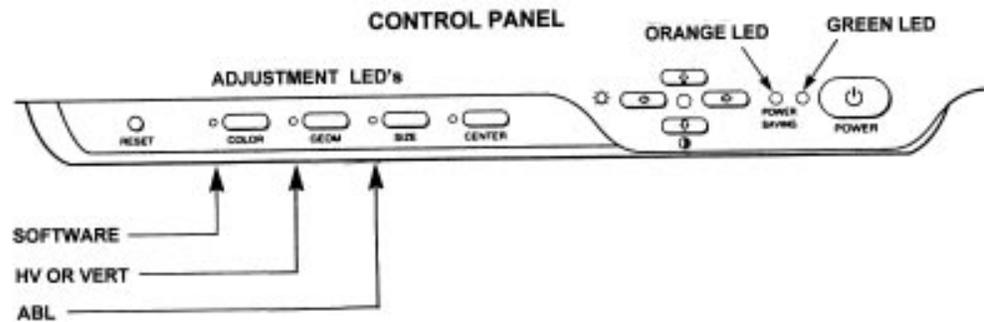

No. 121

Subject: Significance of LED Flashing During Shutdown **Date:** May 15, 1996

Symptom:

(111) If the unit is in Shutdown.

Solution: Then check the front panel LED light patterns for valuable information about the type of shutdown that has occurred. The LED light pattern information is illustrated below.

N
OTES:

1. A shutdown is indicated by flashing both Power (Green) and Power Save (Orange) LEDs along with one or more of the Adjustment LEDs. The type of shutdown is indicated by the Adjustment LEDs as shown in the illustration above.
2. H Scan Failure is not indicated by the Adjustment LEDs pattern for these models.
