CAUTION

SHORT CIRCUIT THE ANODE OF THE PICTURE TUBE AND THE ANODE CAP TO THE METAL CHASSIS, CRT SHIELD, OR THE CARBON PAINTED ON THE CRT, AFTER REMOVAL OF THE ANODE CAP.

WARNING !!

AN ISOLATION TRANSFORMER SHOULD BE USED DURING ANY SERVICE WORK TO AVOID POSSIBLE SHOCK HAZARD DUE TO LIVE CHASSIS, THE CHASSIS OF THIS RECEIVER IS DIRECTLY CONNECTED TO THE POWER LINE.

SAFETY-RELATED COMPONENT WARNING !!

COMPONENTS IDENTIFIED BY SHADING AND MARKED Δ ON THE SCHEMATIC DIAGRAMS, EXPLODED VIEWS AND IN THE PARTS LIST ARE CRITICAL FOR SAFE OPERATION. REPLACE THESE COMPONENTS WITH SONY PARTS WHOSE PART NUMBERS APPEAR AS SHOWN IN THIS MANUAL OR IN SUPPLEMENTS PUBLISHED BY SONY.

ATTENTION

APRES AVOIR DECONNECTE LE CAP DE L'ANODE, COURT-CIRCUITER L'ANODE DU TUBE CATHODIQUE ET CELUI DE L'ANODE DU CAP AU CHASSIS METALLIQUE DE L'APPAREIL, OU AU COUCHE DE CARBONE PEINTE SUR LE TUBE CATHODIQUE OU AU BLINDAGE DU TUBE CATHODIQUE.

ATTENTION !!

AFIN D'EVITER TOUT RISQUE D'ELECTROCUTION PROVENANT D'UN CHÂSSIS SOUS TENTION, UN TRANSFORMATEUR D'ISOLEMENT DOIT ETRE UTILISÉ LORS DE TOUT DÉPANNAGE LE CHÂSSIS DE CE RÉCEPTEUR EST DIRECTMENT RACCORDÉ À L'ALIMENTATION SECTEUR.

ATTENTION AUX COMPOSANTS RELATIFS À LA SÉCURITÉ!!

LES COMPOSANTS IDENTIFIÉS PAR UNE TRAME ET PAR UNE MARQUE Δ SUR LES SCHÉMAS DE PRINCIPE, LES VUES EXPLOSÉES ET LES LISTES DE PIÉCES SONT D'UNE IMPORTANCE CRITIQUE POUR LA SÉCURITÉ DU FONCTIONNEMENT, NE LES REMPLACER QUE PAR DES COMPOSANTS SONY DONT LE NUMÉRO DE PIÉCE EST INDIQUÉ DANS LE PRÉSENT MANUEL OU DANS DES SUPPLÉMENTS PUBLIÉS PAR SONY.

FE-2 SELF DIAGNOSTIC SOFTWARE

The identification of errors within the FE-2 chassis is triggered in one of two ways :- 1: Busy or 2: Device failure to respond to IIC. In the event of one of these situations arising the software will first try to release the bus if busy (Failure to do so will report with a continuous flashing LED) and then communicate with each device in turn to establish if a device is faulty. If a device is found to be faulty the relevant device number will be displayed through the LED (Series of flashes which must be counted) See table 1., non fatal errors are reported using this method. Each time the software detects an error it is stored within the NVM. See Table 2.

Table 1

Error Message	LED Code
No error	00
Reserved	01
OCP (Over Current Protection)	02
Not Used	03
No Vertical Sync	04
IKR Error at power on	05
IIC bus clock and/or data lines low at power on	06
NVM no IIC bus acknowledge at power on	07
Not Used	08
Tuner no acknowledge at power on	09
Sound Processor Error	10
Jungle controller 8 volts error	11

How to enter into Table 2

1. Turn on the main power switch of the TV set and enter into the 'Standby Mode'.
2. Press the following sequence of buttons on the Remote Commander.

3. The following table will be displayed indicating the error count.

Flash Timing Example : e.g. error number 3

Table 2

ERROR MENU			
E02	OCP	(0, 255)	0
E03	OVP N/A	(0, 255)	0
E04	VSUNC	(0, 255)	0

WORKING TIME			
HOURS			2
MINUTES			11

Note: To clear the error count data press '80' on the Remote commander.

The operating instructions mentioned here are partial abstracts from the 'Operating Instruction Manual'. The page numbers of the 'Operating Instruction Manual' remain as in the manual.

Switching On the TV and Automatically Tuning

i The first time you switch on your TV, a sequence of menu screen appear on the TV enabling you to: 1) choose the language of the menu screen, 2) choose the country in which you wish to operate the TV, 3) adjust the picture slant 4) search and store all available channels (TV Broadcast) and 5) change the order in which the channels (TV Broadcast) appear on the screen.

However, if you need to change any of these settings, you can do that by selecting the appropriate option in the  (Set Up menu) or by pressing the Auto Start Up Button  on the TV set.

- 1 Connect the TV plug to the mains socket (220-240V AC, 50Hz)
Press the **⏻** on/off button on the TV set to turn on the TV.
The first time you press this button, a **Language** menu displays automatically on the TV screen.

- 2 Press the **⬇** or **⬆** button on the remote control to select the language, then press the **OK** button to confirm your selection. From now on all the menus will appear in the selected language.

GB

- 3 The **Country** menu appears automatically on the TV screen. Press the **⬇** or **⬆** button to select the country in which you will operate the TV set, then press the **OK** button to confirm your selection.

- i** • If the country in which you want to use the TV set does not appear in the list, select “-” instead of a country.

- 4 Because of the earth's magnetism, the picture might slant. The **Picture Rotation** menu allows you to correct the picture slants if it is necessary.

- a) If it is not necessary, press **⬇** or **⬆** to select **Not necessary** and press **OK**.
- b) If it is necessary, press **⬇** or **⬆** to select **Adjust now**, then press **OK** and correct any slant of the picture between -5 and +5 by pressing **⬇** or **⬆**. Finally press **OK** to store.

- 5 The Auto Tuning menu appears on the screen. Press the **OK** button to select **Yes**.

- 6 The TV starts to automatically search and store all available channels (TV Broadcast) for you.

⚠ This procedure could take some minutes. Please be patient and do not press any button. Otherwise the automatic tuning will not be completed.

⚠ In the case that any channel have been found after the auto tuning process is completed, a new menu appears automatically on the screen asking you to connect the aerial. Please connect the aerial (see page 6) and press **OK**. The auto tuning process will start again.

- 7 **i** After all available channels are captioned and stored, the **Programme Sorting** menu appears automatically on the screen enabling you to change the order in which the channels appear on the screen.

- a) If you do not wish to change the channel order, go to step 8.

- b) If you wish to change the channel order:

- 1 Press the **⬇** or **⬆** button to select the programme number with the channel (TV Broadcast) you wish to rearrange, then press the **⬆** button.

- 2 Press the **⬇** or **⬆** button to select the new programme number position for your selected channel (TV Broadcast), then press **⬆**.

- 3 Repeat steps b)1 and b)2 if you wish to change the order of the other channels.

- 8 Press the **MENU** button to remove the menu from the screen.

 Your TV is now ready for use

continued...

Introducing and Using the Menu System

i Your TV uses an on-screen menu system to guide you through the operations. Use the following buttons on the Remote Control to operate the menu system:

1 Press the MENU button to switch the first level menu on.

2 • To highlight the desired menu or option, press \downarrow or \uparrow .

• To enter to the selected menu or option, press \rightarrow .

• To return to the last menu or option, press \leftarrow .

• To alter settings of your selected option, press \downarrow / \uparrow / \leftarrow or \rightarrow .

• To confirm and store your selection, press OK.

3 Press the MENU button to remove the menu from the screen.

GB

Menu Guide

Level 1	Level 2	Level 3 / Function
		PICTURE ADJUSTMENT The "Picture Adjustment" menu allows you to alter the picture adjustments. To do that: after selecting the item you want to alter press \rightarrow , then press repeatedly \downarrow / \uparrow / \leftarrow or \rightarrow to adjust it and finally press OK to store the new adjustment. This menu also allows you to customise the picture mode based on the programme you are watching: \downarrow Personal (for individual settings). \downarrow Live (for live broadcast programmes). \downarrow Movie (for films).

- **Brightness, Colour and Sharpness** can only be altered if "Personal" mode is selected.
- **Hue** is only available for NTSC colour signal (e.g. USA video tapes).
- Select **Reset** and press **OK** to reset the picture to the factory preset levels.

continued...

Level 1	Level 2	Level 3 / Function
		SOUND ADJUSTMENT The "Sound Adjustment" menu allows you to alter the sound adjustments. To do that: after selecting the item you want to alter, press \rightarrow , then press repeatedly \downarrow / \uparrow / \leftarrow or \rightarrow to adjust it and finally press OK to store the new adjustment.
Mode	\rightarrow Personal (for individual settings) \downarrow Rock \downarrow Pop \downarrow Jazz	
Detail Adjustment	\rightarrow Sound Effect: \downarrow Off: Normal. \downarrow Spatial: Acoustic sound effect. \downarrow Auto volume: \downarrow Off: Volume channel changes according to the broadcast signal. \downarrow On: Volume level of the channels will stay the same, independent of the broadcast signal (e.g. in the case of advertisements). \downarrow TV Speakers: \downarrow Off: Sound from external amplifier connected to the audio outputs on the rear of the TV set. \downarrow On: Sound from the TV set.	

- **Treble and Bass** can only be altered if "Personal" mode is selected.
- Select **Reset** and press **OK** to reset the sound to the factory preset levels.
- In case of a bilingual broadcast select **Dual Sound** and set **A** for sound channel 1, **B** for sound channel 2 or **Mono** for mono channel if available. For a stereo broadcast you can choose **Stereo** or **Mono**.

continued...

Level 1	Level 2	Level 3 / Function
		SLEEP TIMER The "Sleep Timer" option in the "Timer" menu allows you to select a time period for the TV to switch itself automatically into the standby mode.
		To do that: after selecting the option press ▶ , then press ▼ or ▲ to set the time period delay (max. of 4 hours) and finally press OK to store. <ul style="list-style-type: none"> While watching the TV, you can press the ⏮ button on the remote control to display the time remaining. One minute before the TV switches itself into standby mode, the time remaining is displayed on the TV screen automatically.
		LANGUAGE / COUNTRY The "Language/Country" option in the "Set Up" menu allows you to select the language that the menus are displayed in. It also allows you to select the country in which you wish to operate the TV set.
		To do that: after selecting the option, press ▶ and then proceed in the same way as in the steps 2 and 3 of the section "Switching On the TV and Automatically Tuning".
		AUTO TUNING The "Auto Tuning" option in the "Set Up" menu allows you to automatically search for and store all available TV channels.
		To do that: after selecting the option, press ▶ and then proceed in the same way as in TV steps 5 and 6 of the section "Switching On the TV and Automatically Tuning".

continued...

GB

Level 1	Level 2	Level 3 / Function
		PROGRAMME SORTING The "Programme Sorting" option in the "Set Up" menu allows you to change the order in which the channels (TV Broadcast) appear on the screen.
		To do that: after selecting the option, press ▶ and then proceed in the same way as in step 7 b) of the section "Switching On the TV and Automatically Tuning".
		PROGRAMME LABELS The "Programme Labels" option in the "Set Up" menu allows you to name a channel using up to five characters (letters or numbers).
		To do that: <ol style="list-style-type: none"> After selecting the option, press ▶, then press ▼ or ▲ to select the programme number with the channel you wish to name. Press ▶. With the first element of the Label column highlighted, press ▼ or ▲ to select a letter or number (select "-" for a blank), then press ▶ to confirm this character. Select the other four characters in the same way. Finally press OK to store.
		AV PRESET The "AV Preset" option in the "Set Up" menu allows you to designate a name to the external equipment you have connected to the sockets of this TV.
		To do that: <ol style="list-style-type: none"> After selecting the option, press ▶, then press ▼ or ▲ to select the input source you wish to name (AV1 and AV2 are for the rear Scarts and AV3 for front connectors). Then press ▶. In the label column automatically appears a label: <ol style="list-style-type: none"> If you want to use one of the 6 predefined label (CABLE, GAME, CAM, DVD, VIDEO or SAT), press ▼ or ▲ to select the desired label and finally press OK to store. If you want to set a different label, select Edit and press ▶. Then with the first element highlighted, press ▼ or ▲ to select a letter, number or "-" for a blank, then press ▶ to confirm this character. Select the other four characters in the same way and finally press OK to store.

continued...

Level 1	Level 2	Level 3 / Function
		MANUAL PROGRAMME PRESET The "Manual Programme Preset" option in the "Set Up" menu allows you to:
		<p>a) Preset channels or a video input source one by one to the programme order of your choice. To do that:</p> <ol style="list-style-type: none"> 1 After selecting the "Manual Programme Preset" option, press ▶ then with Programme option highlighted press ▶. Press ▼ or ▲ to select on which programme number you want to preset the channel (for VCR, select programme number "0"). Then press ▶. 2  The following option is only available depending on the country you have selected in the "Language/Country" menu. <p>After selecting the System option, press ▶. Then press ▼ or ▲ to select the TV Broadcast system (B/G for western European countries or D/K for eastern European countries). Then press ▶.</p> <ol style="list-style-type: none"> 3 After selecting the Channel option, press ▶. Then press ▼ or ▲ to select the channel tuning ("C" for terrestrial channels or "S" for cable channels). Next press ▶. After that, press the number buttons to enter directly the channel number of the TV Broadcast or the channel of the VCR signal. If you do not know the channel number, press ▼ or ▲ to search for it. When you tune the desired channel, press OK twice to store. <p><i>Repeat all the above steps to tune and store more channels.</i></p>

GB

continued...

Level 1	Level 2	Level 3 / Function
		RGB CENTRING When connecting an RGB source, such as a "PlayStation", you may need to readjust the horizontal position of the picture. In that case, you can readjust it through the "RGB Centring" option in the "Detail Set Up".
		<p>To do that: while watching an RGB source select the "RGB Centring" option and press ▶. Then press ▼ or ▲ to adjust the centre of the picture between -10 and +10. Finally press OK to confirm and store.</p>
		PICTURE ROTATION Because of the earth's magnetism, the picture might slant. In this case, you can correct the pictures slant by using the option "Picture Rotation" in the "Detail Set Up" menu.
		<p>To do that: after selecting the option, press ▶. Then press ▼ or ▲ to correct any slant of the picture between -5 and +5 and finally press OK to store.</p>

Teletext

i Teletext is an information service transmitted by most TV stations. The index page of the teletext service (usually page 100) gives you information on how to use the service. To operate teletext, use the remote control buttons as indicated below.

A Make sure to use a channel (TV Broadcast) with a strong signal, otherwise teletext errors may occur.

To Switch On Teletext :

After select the channel (TV Broadcast) which carries the teletext you wish to view, press **⏏**.

To Select a Teletext page:

Input 3 digits for the page number, using the numbered buttons.

- If you have made a mistake, retype the correct page number.
- If the counter on the screen continues searching, it is because this page is not available. In that case, input another page number

To access the next or preceding page:

Press **PROGR +** (**⏏**) or **PROGR -** (**⏏**).

To superimpose teletext on to the TV:

Whilst you are viewing teletext, press **⏏**. Press it again to cancel teletext mode.

To freeze a teletext page:

Some teletext pages have sub-pages which follow on automatically. To stop them, press **⏏** / **⏏**. Press it again to cancel the freeze.

To reveal concealed information (e.g: answer to a quiz):

Press **⏏** / **⏏**. Press it again to conceal the information.

To Switch Off Teletext:

Press **⏏**.

Fastext

i Fastext service lets you access pages with one button push.

While you are in Teletext mode and Fastext is broadcast, a colour coded menu appears at the bottom of the teletext page. Press the colour button (red, green, yellow or blue) to access the corresponding page.

GB

Connecting Optional Equipment

i Using the following instructions, you can connect a wide range of optional equipment to your TV set. (Connecting cables are not supplied).

** "PlayStation" is a product of Sony Computer Entertainment, Inc.

** "PlayStation" is a trademark of Sony Computer Entertainment, Inc.

Connecting a VCR:

To connect a VCR, please refer to the section "Connecting the aerial and VCR" of this instruction manual. We recommend you connect your VCR using a scart lead. If you do not have a scart lead, tune in the VCR test signal to TV programme number "0" by using "Manual Programme Preset" option. (for details how to manual programme, see page 13, step a).

Also refer to your VCR instruction manual to find out how to find the output channel of your VCR.

Connecting a VCR that supports Smartlink:

i Smartlink is a direct link between the TV set and the VCR. For more information on Smartlink, please refer to the instruction manual of your VCR.

If you use a VCR that supports Smartlink, please connect the VCR by using a Scart lead to the Scart **2** / **3** **F**.

If you have connected a decoder to a VCR which supports Smartlink feature:

Select the "Manual Programme Preset" option in the "Set Up" menu and after entering in the "Decoder" option, select "On" (by using **⏏** or **⏏**). Repeat this option for each scrambling signal.

*This option is only available depending on the country you have selected in the "Country" menu.

- TV system Autodetection.

Troubleshooting

 Here are some simple solutions to the problems which may affect the picture and sound.

Problem	Solution
No picture (screen is dark) and no sound.	<ul style="list-style-type: none"> • Check the aerial connection. • Plug the TV in and press the  button on the front of TV. • If the standby indicator  is on, press  button on the remote control.
Poor or no picture (screen is dark), but good sound.	<ul style="list-style-type: none"> • Using the menu system, select the "Picture Adjustment" menu and select "Reset" to return to the factory settings.
No picture or no menu information from equipment connected to the Scart connector.	<ul style="list-style-type: none"> • Check that the optional equipment is on and press the  button repeatedly on the remote control until the correct input symbol is displayed on the screen.
Good picture, no sound.	<ul style="list-style-type: none"> • Press the  +/- button on the remote control. • Check that "TV Speakers" is "On" on the "Sound Adjustment" menu.
No colour on colour programmes.	<ul style="list-style-type: none"> • Using the menu system, select the "Picture Adjustment" menu and select "Reset" to return to factory settings.
Distorted picture when changing programmes or selecting teletext.	<ul style="list-style-type: none"> • Turn off any equipment connected to the Scart connector on the rear of the TV.
Wrong characters appear when viewing teletext.	<ul style="list-style-type: none"> • Using the menu system, enter to the "Language/ Country" menu and select the country in which you operate the TV set.
Picture slanted	<ul style="list-style-type: none"> • Using the menu system, select the "Picture Rotation" option in the "Detail Set Up" menu to correct the picture slant.
Noisy picture when viewing a TV channel.	<ul style="list-style-type: none"> • Using the menu system, select the "Manual Programme Preset" menu and adjust Fine Tuning (AFT) to obtain better picture reception. • Using the menu system, select the "Noise Reduction" option in the "Detail Set Up" menu and select "On" to reduce the noise in the picture.
No unscrambling whilst viewing a scrambling channel with a decoder connected through the Scart connector  2/  .	<ul style="list-style-type: none"> • Using the menu system, select the "Set Up" menu. Then enter to "Detail Set Up" option and set "AV2 Output" to "TV".
Remote control does not function.	<ul style="list-style-type: none"> • Replace the batteries.
The standby indicator  on the TV flashes.	<ul style="list-style-type: none"> • Contact to your nearest Sony service centre.

 In case of problems, have your TV serviced by qualified personnel. Never open the casing yourself.

Design and specifications are subject to change without notice.

Ecological Paper- Totally Chlorine Free 

SECTION 2 DISASSEMBLY

2-1. Rear Cover Removal

Release the mains power cable from its securing posts. Remove the rear cover fixing screws indicated. Pull the rear cover away from the front beznet.

2-2. Chassis Removal and Refitting

To remove lift the main bracket rear slightly and slide the chassis away from the beznet. Ensure that the interconnecting leads are released from their purse locks to prevent damage being caused.

When refitting the chassis ensure that the main bracket is located in the beznet guide slots before sliding the chassis forwards. Refit the interconnecting leads in their respective purse locks.

2-3. A Board PWB Removal [Step 1]

Screw.

Remove the screw securing the PWB to the main bracket.

2-4. A Board PWB Removal [Step 2]

Clip.

Release the 3 securing clips located at the side of the chassis and slide the PWB clear of the bracket.

2-5. Service Position

Place the chassis in the position indicated to carry out servicing. To gain access to the high voltage areas of the A Board the bottom plates need to be removed (see page 15).

2-6. Picture Tube Removal

WARNING: BEFORE REMOVING THE ANODE CAP

High voltage remains in the CRT even after the power is disconnected. To avoid electric shock, discharge CRT **before** attempting to remove the anode cap. Short between anode and CRT coated earth ground strap.

1. Discharge the anode of the CRT and remove the anode cap.
2. Release the EHT lead from its CRT support bracket.
3. Unplug all interconnecting leads from the Deflection yoke, degaussing coils, Rotation coil and CRT grounding strap.
4. Remove the C Board from the CRT.
5. Loosen the VM Block fixing screw and remove.
6. Remove the chassis assembly.
7. Loosen the Deflection yoke fixing screw and remove.
8. Remove the Degaussing Coil holders.
9. Place the set with the CRT face down on a cushion.
10. Unscrew the four CRT fixing screws [located on each CRT corner] and remove the CRT.
11. Remove the Degaussing Coils.
Remove the CRT grounding strap and spring tentioners.
[Take care not to handle the CRT by the neck.]

Removal of the Anode-Cap

* REMOVING PROCEDURES.

- ① Turn up one side of the rubber cap in the direction indicated by the arrow ①

- ② Using a thumb pull up the rubber cap firmly in the direction indicated by the arrow ②

- ③ When one side of the rubber cap is separated from the anode button, the anode-cap can be removed by turning up the rubber cap and pulling it up in the direction of the arrow ③

How to handle the Anode-Cap

1. To prevent damaging the surface of the anode-cap do not use sharp materials.
2. Do not apply too great a pressure on the rubber, as this may cause damage to the anode connector.
3. A metal fitting called a shatter hook terminal is fitted inside the rubber cap.
4. Do not turn the rubber foot over excessively, this may cause damage if the shatter hook sticks out.

REMOVAL AND REPLACEMENT OF THE MAIN-BRACKET BOTTOM PLATES.

(1) REMOVING THE PLATES

In the event of servicing being required to the solder side of the D Board printed wiring board, the bottom plates fitted to the main chassis bracket require to be removed.

This is performed by cutting the gates with a sharp wire cutter at the locations indicated by the arrows.

Note : There are 3 plates fitted to the main bracket and secured by 3 gates.

Only remove the necessary plate to gain access to the printed wiring board.

For safety reasons, on no account should the plates be removed and not refitted after servicing.

(2) REFITTING THE PLATES

Because the plates differ in size it is important that the correct plates are refitted in their original location.

Please note that the plates need to be rotated 180 degrees from their cut position to allow the tabs to be fitted into their catch positions.

SECTION 3 SET-UP ADJUSTMENTS

- When complete readjustment is necessary or a new picture tube is installed, carry out the following adjustments.
- Unless there are specific instructions to the contrary, carry out these adjustments with the rated power supply.
- Unless there are specific instructions to the contrary, set the controls and switches to the following settings :

Contrast 80% [or remote control normal]

Brightness 50%

Carry out the adjustments in the following order :

- 3-1. Beam Landing.
- 3-2. Convergence.
- 3-3. Focus.
- 3-4. White Balance.

Note : Test equipment required.

1. Color bar/pattern generator.
2. Degausser.
3. Oscilloscope.
4. Digital multimeter.

Preparation:

1. In order to reduce the influence of geomagnetism on the set's picture tube, face it in an easterly or westerly direction.
2. Switch on the set's power and degauss with the degausser.

3-1. Beam Landing

1. Input an all white signal from the pattern generator. Set the Contrast and Brightness to normal.
2. Set the pattern generator raster signal to Red.
3. Move the deflection yoke forward and adjust with the purity control so that the Red is at the centre and the Blue and Green take up equally sized areas on each side of the screen. [See Fig.3-1 - 3-3].
4. Move the deflection yoke backwards and adjust so that the entire screen becomes Red. [See Fig.3-1]
5. Switch the raster signal to Blue, then to Green and verify the condition.
6. When the position of the deflection yoke has been determined, fasten the deflection yoke with the screws.
7. If the beam does not land correctly in all the corners, use a magnet to correct it. [See Fig.3-4]

Fig. 3-1.

Caution :

High voltages are present on the Deflection yoke terminals - take care when handling the Deflection yoke whilst carrying out adjustments.

Fig. 3-2.

Fig. 3-3.

Fig.3-4

3-2. Convergence

Preparation:

- Before starting this adjustment, adjust the focus, horizontal size and vertical size.
- Minimize the Brightness setting.
- Input a dot pattern from the pattern generator.

Horizontal and Vertical Static Convergence

Fig.3-5

1. [Moving horizontally], adjust the H.STAT control so that the Red, Green and Blue points are on top of each other at the centre of the screen.
2. [Moving vertically], adjust the V.STAT magnet so that the Red, Green and Blue points are on top of each other at the centre of the screen.
3. If the H.STAT variable resistor is unable to bring the Red, Green and Blue points together at the centre of the screen, adjust the horizontal convergence with the H.STAT variable resistor and the V.STAT magnet in the manner indicated below.
[In this case, the H.STAT variable resistor and the V.STAT magnet influence each other].

- Tilt the V.STAT magnet and adjust the static convergence by opening or closing the V.STAT magnet.

4. If the V.STAT magnet is moved in the direction of the (a) and (b) arrows, the Red, Green and Blue points move as indicated below.

Operation of the BMC (Hexapole) magnet.

The movement of the magnets interact with each other and so the respective dot position should be monitored while carrying out this adjustment.

Use the H.STAT VR to adjust the Red, Green and Blue dots so that they coincide at the centre of the screen (by moving the dots in the horizontal direction).

Geometry Adjustment.

Preparation:

Before starting this adjustment, adjust the horizontal and vertical static convergence.

1. Remove the deflection yoke spacer.
2. Tilt the deflection yoke as indicated in the figure below and optimise the geometry.
Tilting the DY Up and Down will balance the upper and lower pin adjustment.
Tilting the DY Left and Right will balance the H-Trap adjustment.
3. Re-install the deflection yoke spacer.

HTIL Adjustment

HTIL correction can be performed by adding a TLH correction assembly to the Deflection yoke.

YCH Adjustment

TLV Adjustment

Screen Corner Convergence

If you are unable to adjust the corner convergence properly, this can be corrected with the use of permalloy magnets.

Install the permalloy assembly for the area that needs correcting.

Layout of each control

3-3. Focus Adjustment

1. Receive a television broadcast signal.
2. Normalize the picture setting.
3. Adjust the focus control located on the flyback transformer to obtain the best focus at the centre of the screen. Bring only the centre area of the screen into focus, the magenta-ring appears on the screen. In this case, adjust the focus to optimize the screen uniformly.

3-4. Screen (G2), White Balance

[Adjustment in the service mode using the remote commander]

G2 adjustment

1. Input a dot signal from the pattern generator.
2. Enter the 'Service Mode' by pressing 'TEST', 'TEST' and '38' (TT-38) on the remote commander, to set up the G2 service adjustment mode.
3. Whilst watching the picture, adjust the G2 control [SCREEN] located on the Flyback Transformer to the point where the OSD menu indication shows "OK".

White balance adjustment for TV mode

1. Input an all-white signal from the pattern generator.
2. Enter into the 'Service Mode' by pressing 'TEST', 'TEST' and 'MENU' on the Service Commander.
3. Select 'Service' from the on screen menu display and press the right arrow button on the remote commander.
4. The 'Service' menu will appear on the screen. [See Page 19]
5. Set the 'Contrast' to MAX.
6. Set the 'R-Drive' to 25.
7. Adjust the 'G-Drive' and the 'B-Drive' so that the white balance becomes optimum.
8. Press the 'OK' button to write the data for each item.
9. Set the 'Contrast' to MIN.
10. Adjust the 'G-Cutoff', and the 'R-Cutoff' with the left and right buttons on the remote commander so that the white balance becomes optimum.
11. Press the 'OK' button to write the data for each item.

SECTION 4 CIRCUIT ADJUSTMENTS

4-1. Electrical Adjustments

Service adjustments to this model can be performed using the supplied remote Commander RM-887.

How to enter into the Service Mode

1. Turn on the main power switch and enter into the stand-by mode.
2. Press the following sequence of buttons on the Remote Commander.

‘TT—’ will appear in the upper right corner of the screen.
Other status information will also be displayed.

3. Press ‘MENU’ on the remote commander to obtain the following menu on the screen.

Geometry
Service
Design
Status
Sound
IF adjust
Error Menu
FE-2 Stereo v1.30
Factory data FFh FFh
MSP Device : MSP3411G

4. Move to the corresponding adjustment item using the up or down arrow buttons on the Remote Commander.
5. Press the right arrow button to enter into the required menu item.
6. Press the ‘Menu’ button on the Remote Commander to quit the Service Mode when all adjustments have been completed.

Note :

- Before performing any adjustments ensure that the correct model has been selected in the ‘Model Setting’ menu.
- After carrying out the service adjustments, to prevent the customer accessing the ‘Service Menu’ switch the TV set OFF and then ON.

AGC Adjust	(-16, +15)	+0
Automute		1
Audio Gain		0
L Gating		0

Sub Brightness Adjustment

1. Input a Monoscope pattern.
2. Press ‘TEST’ ‘TEST’ 13 on the Remote Commander.
3. Adjust the ‘Sub-Brightness’ data so that there is barely a difference between the 0 IRE and 10 IRE signal levels.

Sub Contrast Adjustment

1. Input a video signal that contains a small 100% white area on a black background.
2. Connect an digital voltmeter to Pin 10 of J701 [C Board].
3. Adjust the Sub-Contrast [‘TT11’] to obtain a voltage of 105 +/- 5V (KV-29FX30) or 96 +/-5V (KV-25FX30).

Sub Colour Adjustment

1. Receive a PAL colour bar signal.
2. Connect an oscilloscope to Pin 5 of CN003 [A Board].
3. Enter into the 'Service' service menu.
4. Adjust the 'Sub Colour' data so that the Cyan, Magenta and Blue colour bars are of equal levels as indicated below.

Tuner AGC Adjustment

Note:

There should be no need to adjust the AGC as this is pre-adjusted during manufacture of the FRONTEND. If the AGC does need adjustment then follow steps 1. to 4. below.

1. Receive a signal of 62dBuV / 75 ohm terminated via the tuner antenna socket.
2. Connect a voltmeter to pin1 of TU101 [print side of A Board] or to the AGC pin of CN001 [mount side of A Board].
3. Confirm that the AGC voltage is 3.5volts +/- 0.3volts.
4. If adjustment is required, then re-adjust the AGC variable resistor (located at the top rear of the FRONTEND) to obtain a voltage of 3.5V +/- 0.3V.

[Print side of A board]

Deflection System Adjustment

1. Enter into the 'Geometry' service menu.
2. Select and adjust each item in order to obtain the optimum image.

SECTION 6 EXPLODED VIEWS

NOTE :

- Items with no part number and no description are not stocked because they are seldom required for routine service.
- The construction parts of an assembled part are indicated with a collation number in the remarks column.
- Items marked “*” are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.

6-1. CHASSIS

Note : Les composants identifiés par une trame et par une marque Δ sont d'une importance critique pour la sécurité. Ne les remplacer que par des pièces du numéro spécifié.

Note : The components identified by shading and marked Δ are critical for safety. Replace only with the part numbers specified in the parts list.

TRACE

A new TV Repair Assistance Tool that combines ease of use and powerful PC software tools to allow you to save valuable time during many TV repairs.

The TRACE interface connects to the PC's serial port. It provides connection to the TV's I²C bus and can be provided with an InfraRed transmitter (optional).

The interface is powered by a standard 9 V PP3 battery for portable use, and can also be powered by an external 9V/25mA DC power supply.

The TRACE software that is supplied with the interface allows you to:

- Read, restore and compare NVM contents via the I²C bus
- Acknowledge check of all I²C devices in the TV set
- Read Error Codes (emulation of the Error Reader tool)

With the optional IR Add-on kit, the following features can be added:

- Remote Commander emulation
- User programmable Functional Check through Infrared
- Fast and documented Test Mode setting of all Sony TV chassis

Additional features such as Adjustments and Troubleshooting are available in chassis-dependent software modules. Please contact your local Sony Service organisation for the latest information.

Note: For workshops already using the existing I²C Link parallel port interface (9-948-320-30), this software can be used as well, replacing the TV Data Handling software (9-948-340-50), but Error Reader and IR functions can only be accessed with the TRACE interface.

Partnumbers:	TRACE Starter Kit (TRACE interface + software):	9-948-320-70
	TRACE Software (for users of the I ² C Link interface):	9-948-340-80
	TRACE IR Add-on (IR interface + Remote Commander software):	9-948-320-80

PC requirements: IBM-compatible PC with operating system Windows95, Windows98, or WindowsNT*.

* WindowsNT only supported with TRACE interface
