DL1S Mechanism Series

Colour

(S).....Silver Type

(K).....Black Type (S35EE Only)

Specifications

Power supply:	AC120 V, 60 Hz (DVD-S35PLA only) AC220-240V, 50Hz (DVD-S35EE/GN only) AC110-240V, 50/60Hz (except DVD-S35PLA/EE/GN)
Power consumption:	14 W
Dimensions:	430 (W)×267 (D)×60 (H) mm [1615/ 16”(W) x 108/ 16”(D) x 27/ 16” (H)] (excludingprotrusions)

Mass:	2.1 kg (4.7 lb.)
Signal system:	NTSC (DVD-S35PX only)
	PAL625/50, PAL525/60, NTSC (except DVD-S35PX)
Operating temperature range:	+5 to+35°C (+41 to 95°F)
Operating humidity range:	5 to 90% RH (no condensation)
Region number:	Region No.1 (DVD-S35PX only)
	Region No.2 (DVD-S35GC/GCA)
	Region No.3 (DVD-S35GCS/GCU/GD)
	Region No.4 (DVD-S35GN/PL/PLA)
	Region No.5 (DVD-S35EE only)

Discs played [8 cm (3”) or 12 cm (5”)]:

(1) DVD-RAM (DVD-VR compatible)

(2) DVD-Audio (except DVD-S35PX)

(3) DVD-Video

(4) DVD-R (DVD-Video compatible)

(5) CD-Audio (CD-DA)

(6) Video CD

(7) SVCD (Conforming to IEC62107)

(8) CD-R/CD-RW (CD-DA, Video CD formatted discs)

(9) WMA/MP3

•Maximum number of tracks and groups recognizable:

999 tracks and 99 groups

•Compatible compression rate:

WMA:	between 48 kbps and 192 kbps
MP3:	between 32 kbps and 320 kbps

(10) JPEG

•Exif Ver 2.1 JPEG Baseline files

•Maximum number of pictures and groups recognizable:

3000 pictures and 300 groups

•Picture resolution:

between 320× 240 and 6144× 4096 pixels (sub sampling is 4:2:2 or 4:2:0)

Video output:

Output level:	1 Vp-p (75Ω)
Output terminal:	Pin jack
Number of terminal:	1 system

S video output:

Y output level:	1 Vp-p (75Ω)
C output level:	NTSC; 0.286 Vp-p (75Ω) PAL; 0.300Vp-p (75Ω) (except DVD-S35PX)
Output terminal:	S terminal
Number of terminal:	1 system

Component video output (480P/480I)
(DVD-S35PXonly)
(NTSC:480p/480I,PAL:576I)
(exceptDVD-S35PX)

Y output level:	1 Vp-p (75Ω)
PB output lebel:	0.7 Vp-p (75Ω)
PR output level	0.7 Vp-p (75Ω)
Output terminal:	Pin jack (Y:green, PB :blue, PR :red)
Number of terminal:	1 system

Audio output:

Output level:	2 Vrms (1 kHz, 0 dB)
Output terminal:	Pin jack
Number of terminal	
2 channel:	1 system

Audio performance:

(1)	Frequency response:	
	•DVD (linear audio):	4 Hz-22 kHz (48 kHz sampling)
		4 Hz-44 kHz (96 kHz sampling)
	•DVD-Audio: (exept DVD-S35PX)	4 Hz-88 kHz (192 kHz sampling)
	•CD audio:	4 Hz-20 kHz
(2)	S/N ratio:	
	•CD audio:	115 dB
(3)	Dynamic range:	
	•DVD (linear audio):	100 dB
	•CD audio:	98 dB
(4)	Total harmonic distortion:	
	•CD audio:	0.0025%

Digital audio output:

Optical digital output:	Optical terminal

Pickup

Wave length:	658 nm/790 nm
Laser power:	CLASS Ua/ CLASS I (DVD-S35PX only)
	CLASS 2/ CLASS 1 (except DVD-S35PX)

Power consumption in standby mode:

approx. 2W

Solder:

This model uses lead free solder (PbF).

Note:

Specifications are subject to change without notice.
Mass and dimensions are approximate.

MPEG Layer-3 audio decoding technology licensed from Fraunhofer IIS and Thomson multimedia.

Windows Media, and the Windows logo are trademarks, or registered trademarks of Microsoft Corporation in the United States and/or other countries.
WMA is a compression format developed by Microsoft Corporation. It achieves the same sound quality as MP3 with a file size that is smaller than that of MP3.

■ **Built-in decoders**
You can play discs with these symbols.

⚠ WARNING

This service information is designed for experienced repair technicians only and is not designed for use by the general public.
It does not contain warnings or cautions to advise non-technical individuals of potential dangers in attempting to service a product.
Products powered by electricity should be serviced or repaired only by experienced professional technicians. Any attempt to service or repair the product or products dealt with in this service information by anyone else could result in serious injury or death.

TOP NEXT

1 SAFETY PRECAUTIONS

TOP PREVIOUS NEXT

TOP PREVIOUS NEXT

1.1 GENERAL GUIDELINES

TOP PREVIOUS NEXT

1. When servicing, observe the original lead dress. If a short circuit is found, replace all parts which have been overheated or damaged by the short circuit.

2. After servicing, see to it that all the protective devices such as insulation barriers, insulation papers shields are properly installed.

3. After servicing, make the following leakage current checks to prevent the customer from being exposed to shock hazards.

1.1.1 LEAKAGE CURRENT COLD CHECK

1.1.2 LEAKAGE CURRENT HOT CHECK (See Figure 1 .)

TOP PREVIOUS NEXT

1.1.1 LEAKAGE CURRENT COLD CHECK

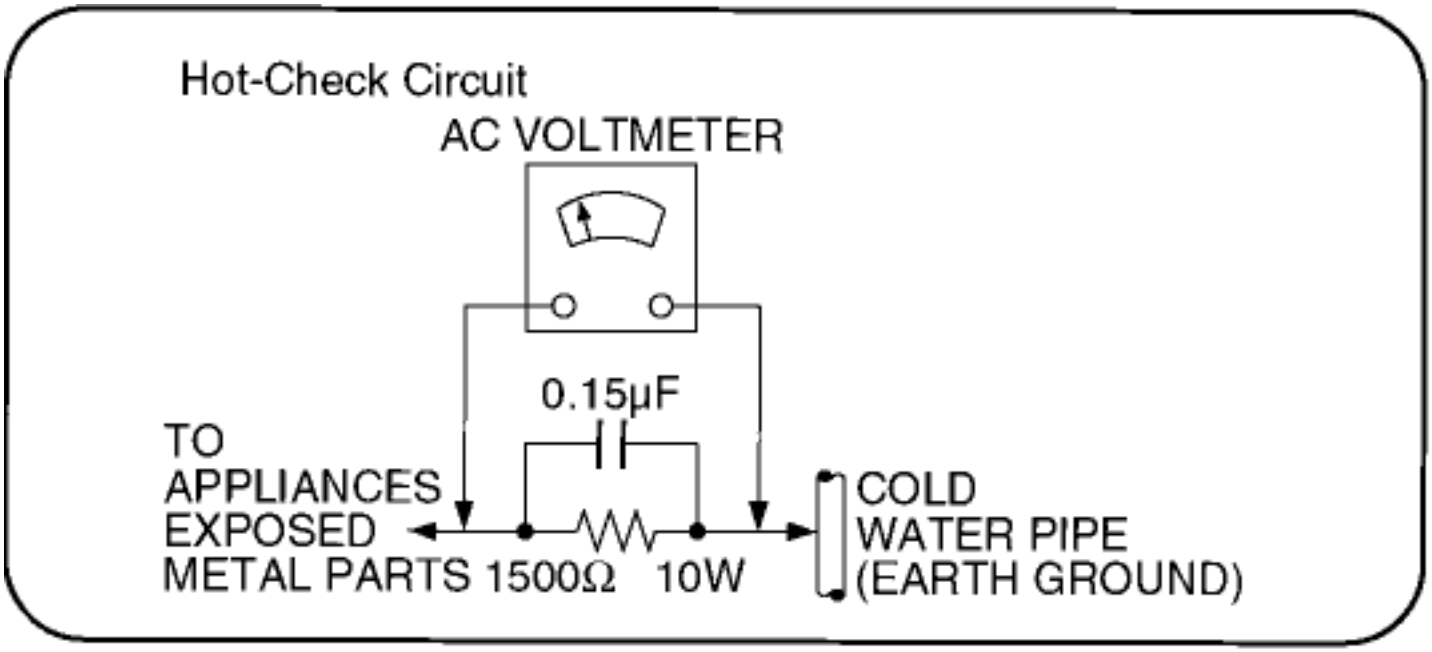
TOP PREVIOUS NEXT

1. Unplug the AC cord and connect a jumper between the two prongs on the plug.

2. Measure the resistance value, with an ohmmeter, between the jumpered AC plug and each exposed metallic cabinet part on the equipment such as screwheads, connectors, control shafts, etc. When the exposed metallic part has a return path to thechassis,the reading should be between 1MΩ and 5.2MΩ.
   When the exposed metal does not have a return path to the chassis, the reading must be

.

Figure 1



TOP PREVIOUS NEXT

1.1.2 LEAKAGE CURRENT HOT CHECK (See Figure 1 .)

TOP PREVIOUS NEXT

1. Plug the AC cord directly into the AC outlet. Do not use an isolation transformer for this check.

2. Connect a 1.5kΩ, 10 watts resistor, in parallel with a 0.15 µF capacitors, between each exposed metallic part on the set and a good earth ground such as a water pipe, as shown in Figure 1 .

3. Use an AC voltmeter, with 1000 ohms/volt or more sensitivity, to measure the potential across the resistor.

4. Check each exposed metallic part, and measure the voltage at each point.

5. Reverse the AC plug in the AC outlet and repeat each of the above measurements.

6. The potential at any point should not exceed 0.75 volts RMS. A leakage current tester (Simpson Model 229 or equivalent) may be used to make the hot checks, leakage current mu3st not exceed 1/2 milliamp. In case a measurement is outsideofthe limits specified, there is a possibility of a shock hazard, and the equipment should be repaired and rechecked before it is returned to the customer.

TOP PREVIOUS NEXT

2 PREVENTION OF ELECTRO STATIC DISCHARGE (ESD) TO ELECTROSTATICALLY SENSITIVE (ES) DEVICES

TOP PREVIOUS NEXT

Some semiconductor (solid state) devices can be damaged easily by static electricity. Such components commonly are called Electrostatically Sensitive (ES) Devices. Examples of typical ES devices are integrated circuits and some field-effect transistorsand semiconductor"chip" components. The following techniques should be used to help reduce the incidence of component damage caused by electro static discharge (ESD).

1. Immediately before handling any semiconductor component or semiconductor-equipped assembly, drain off any ESD on your body by touching a known earth ground. Alternatively, obtain and wear a commercially available dischargingESDwrist strap, which should be removed for potential shock reasons prior to applying power to the unit under test.

2. After removing an electrical assembly equipped with ES devices, place the assembly on a conductive surface such as alminum foil, to prevent electrostatic charge buildup or exposure of the assembly.

3. Use only a grounded-tip soldering iron to solder or unsolder ES devices.

4. Use only an anti-static solder removal device. Some solder removal devices not classified as "anti-static (ESD protected)" can generate electrical charge sufficient to damage ES devices.

5. Do not use freon-propelled chemicals. These can generate electrical charges sufficient to damage ES devices.

6. Do not remove a replacement ES device from its protective package until immediately before you are ready to install it. (Most replacement ES devices are packaged with leads electrically shorted together by conductive foam, alminum foil or comparableconductivematerial).

7. Immediately before removing the protective material from the leads of a replacement ES device, touch the protective material to the chassis or circuit assembly into which the device will be installed.

   Caution

Be sure no power is applied to the chassis or circuit, and observe all other safety precautions.

8. Minimize bodily motions when handling unpackaged replacement ES devices. (Otherwise hamless motion such as the brushing together of your clothes fabric or the lifting of your foot from a carpeted floor can generate static electricity (ESD) sufficient todamagean ES device).

3 Precaution of Laser Diode

TOP PREVIOUS NEXT

CAUTION:

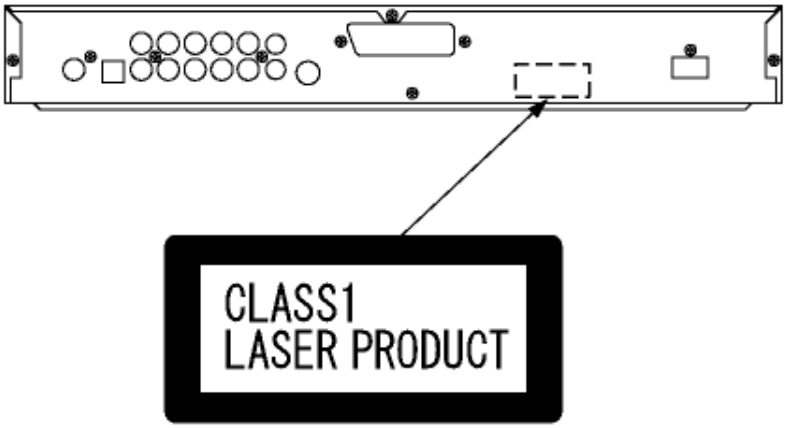
This product utilizes a laser diode with the unit turned “on”, invisible laser radiation is emitted from the pickup lens.
Wave length: 658 nm/790 nm
Maximum output radiation power from pickup: 100 μ W/VDE
Laser radiation from the pickup lens is safety level,but be sure the followings:

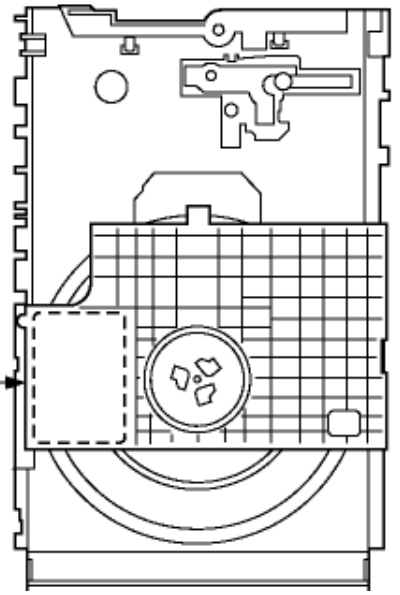
1. Do not disassemble the optical pickup unit, since radiation from exposed laser diode is dangerous.
2. Do not adjust the variable resistor on the pickup unit. It was already adjusted.
3. Do not look at the focus lens using optical instruments.
4. Recommend not to look at pickup lens for a long time.

ACHTUNG:

Dieses Produkt enthält eine Laserdiode.
Im eingeschalteten Zustand wird unsichtbare Leserstrahlung von der Laserinheit adgestrahit.
Wellenlänge: 658 nm/790 nm
Maximale Strahlungsleistung der Lasereinheit: 100 μ W/VDE
Die Strahlungan der Lasereinheit ungefährlich, wenn folgende Punkte beachtet werden:

1. Die Lasereinheit nicht zerlegen, da die Strahlung an der freigelegten Laserdiode gefährlich ist.
2. Den werkseitig justierten Einstellregler der Lasereinhit nicht verstellen.
3. Nicht mit optischen Instrumenten in die Fokussierlines blicken.
4. Nicht über längere Zeit in die Fokussierlines blicken.





CAUTION!
THIS PRODUCT UTILIZES A LASER.
USE OF CONTROLS OR ADJUSTMENTS OR PERFORMANCE OF PROCEDURES OTHER THAN THOSE SPECIFIED HEREIN MAY RESULT IN HAZARDOUS RADIATION EXPOSURE.

4 About lead free solder (PbF)

TOP PREVIOUS NEXT

Caution:

- Pb free solder has a higher melting point than standard solder; Typically thmelting point is 50 - 70°F (30 - 40°C) higher. Please use a high temperature soldering iron. In case of the soldering iron with temperature control,pleaseset it to 700 ± 20°F (370 ± 10°C).

- Pb free solder will tend to splash when heated too high (about 1100°F/ 600°C).

When soldering or unsoldering, please completely remove all of the solder on the pins or solder area, and be sure to heat the soldering points with the Pb free solder until it melts enough.

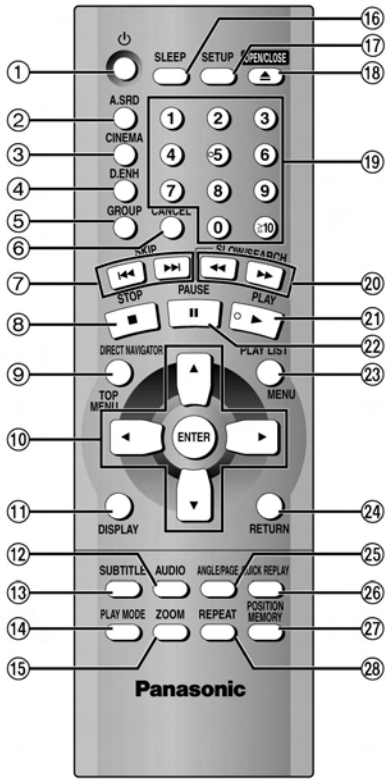
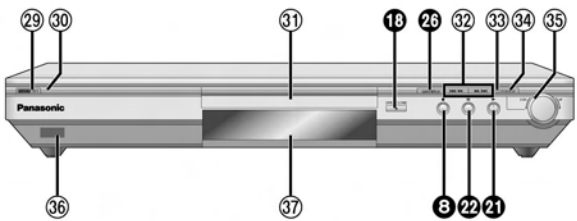
5.1 Operating instructions

TOP PREVIOUS NEXT

TOP PREVIOUS NEXT





- Controls such as ⑧ function the same as those on the remote control.
- The actual marking of the standby/on switch depends on the area. Illustrations in these operating instructions use the markings shown in the above illustration.

① **Standby/on button (⏻)**
② **Advanced Surround button (A.SRD)**
③ **Cinema button (CINEMA)**
④ **Dialogue Enhancer button (D.ENH)**
⑤ **Group button (GROUP)**
⑥ **Cancel button (CANCEL)**
⑦ **Skip buttons (⏮, ⏭ SKIP)**
⑧ **Stop button (■ STOP)**
⑨ **Top menu, Direct navigator button (TOP MENU, DIRECT NAVIGATOR)**
⑩ **Cursor buttons (▲, ▼, ◄, ►), Enter button (ENTER)**
⑪ **Display button (DISPLAY)**
⑫ **Audio button (AUDIO)**
⑬ **Subtitle button (SUBTITLE)**
⑭ **Play mode button (PLAY MODE)**
⑮ **Zoom button (ZOOM)**
⑯ **Sleep button (SLEEP)**
⑰ **Setup button (SETUP)**
⑱ **Open/Close button (⏏ OPEN/CLOSE)**
⑲ **Numbered buttons (1–9, 0, ≧10)**
⑳ **Slow/Search buttons (◄◄, ►► SLOW/SEARCH)**
㉑ **Play button (► PLAY)**
㉒ **Pause button (❚❚ PAUSE)**
㉓ **Menu, Play list button (MENU, PLAY LIST)**
㉔ **Return button (RETURN)**
㉕ **Angle/page button (ANGLE/PAGE)**
㉖ **Quick replay button (QUICK REPLAY)**
㉗ **Position memory button (POSITION MEMORY)**
㉘ **Repeat button (REPEAT)**
㉙ **Standby/on switch (⏻/I)**
Press to switch the unit from on to standby mode or vice versa. In standby mode, the unit is still consuming a small amount of power.
㉚ **Units sold outside the U.S.A. and Canada**
Standby indicator (⏻)
When the unit is connected to the AC mains supply, this indicator lights up in standby mode and goes out when the unit is turned on.
㉛ **Disc tray**
㉜ **Skip/Slow/Search buttons (⏮/◄◄, ►►/⏭)**
㉝ **Zoom indicator**
㉞ **Zoom mode button (ZOOM MODE)**
㉟ **Zoom dial (DOWN, UP)**
㊱ **Remote control signal sensor**

6 PREVENTION OF STATIC ELECTRICITY DISCHARGE

TOP PREVIOUS NEXT

The laser diode in the traverse unit (optical pickup) may brake down due to static electricity of clothes or human body. Use due caution to electrostatic breakdown when servicing and handling the laser diode.

TOP PREVIOUS NEXT

6.1 Grounding for electrostatic breakdown prevention

TOP PREVIOUS NEXT

Some devices such as the DVD player use the optical pickup (laser diode) and the optical pickup will be damaged by static electricity in the working environment. Proceed servicing works under the working environment where grounding works is completed.

TOP PREVIOUS NEXT

6.1.1 Worktable grounding

TOP PREVIOUS NEXT

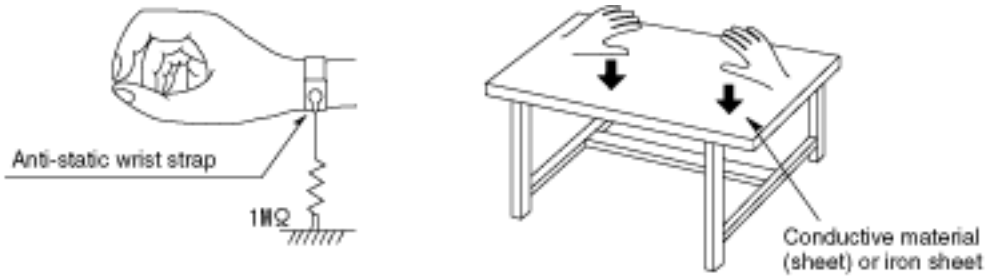
1. Put a conductive material (sheet) or iron sheet on the area where the optical pickup is placed, and ground the sheet.

TOP PREVIOUS NEXT

6.1.2 Human body grounding

TOP PREVIOUS NEXT

1. Use the anti-static wrist strap to discharge the static electricity form your body.



TOP PREVIOUS NEXT

6.1.3 Handling of optical pickup

TOP PREVIOUS NEXT

1. To keep the good quality of the optical pickup maintenance parts during transportation and before installation, the both ends of the laser diode are short-circuited. After replacing the parts with new ones, remove the short circuit accordingtothe correct procedure. (See this Technical Guide.)

2. Do not use a tester to check the laser diode for the optical pickup. Failure to do so will damage the laser diode due to the power supply in the tester.

TOP PREVIOUS NEXT

6.2 Handling Precautions for Traverse Unit (Optical Pickup)

TOP PREVIOUS NEXT

1. Do not give a considerable shock to the traverse unit (optical pickup) as it has an extremely high-precise structure.

2. When replacing the optical pickup, install the flexible cable and cut its short land with a nipper. See the optical pickup replacement procedure in this Technical Guide. Before replacing the traverse unit, remove the short pin for preventingstaticelectricity and install a new unit. Connect the connector as short times as possible.

3. The flexible cable may be cut off if an excessive force is applied to it. Use caution when handling the cable.

4. The half-fixed resistor for laser power adjustment cannot be adjusted. Do not turn the resistor.

TOP PREVIOUS NEXT

8.3 Clamp Plate Unit

TOP PREVIOUS NEXT

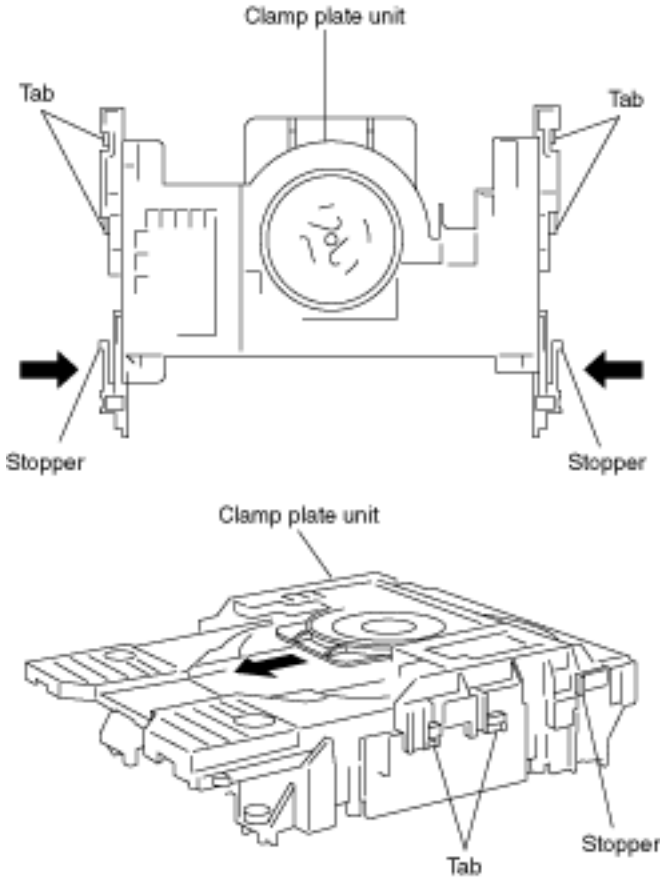
1. Spread the stopper with hand to slide the tabs and remove the clamp plate unit.

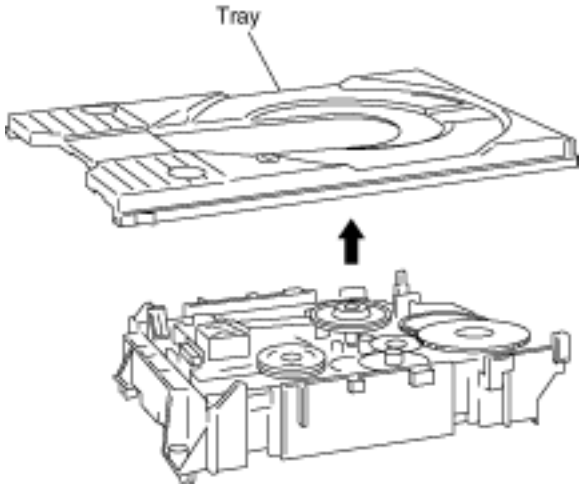


TOP PREVIOUS NEXT

8.4 Tray

TOP PREVIOUS NEXT

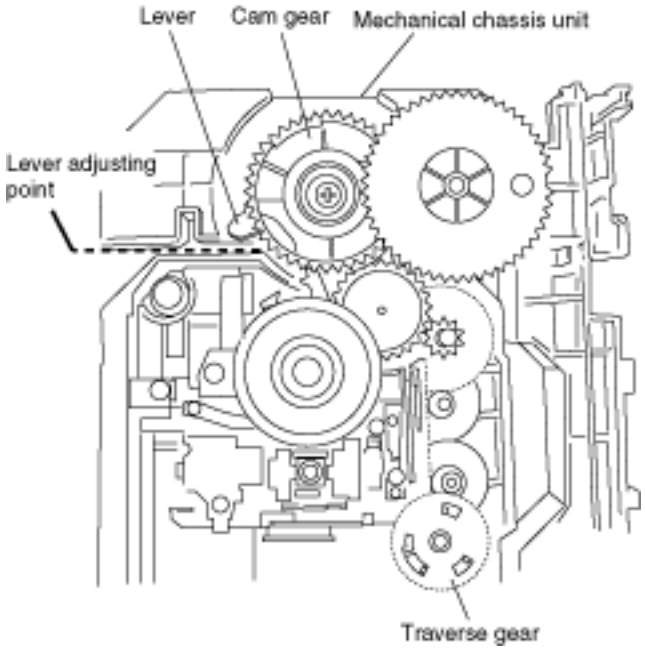
1. Lift the tray.



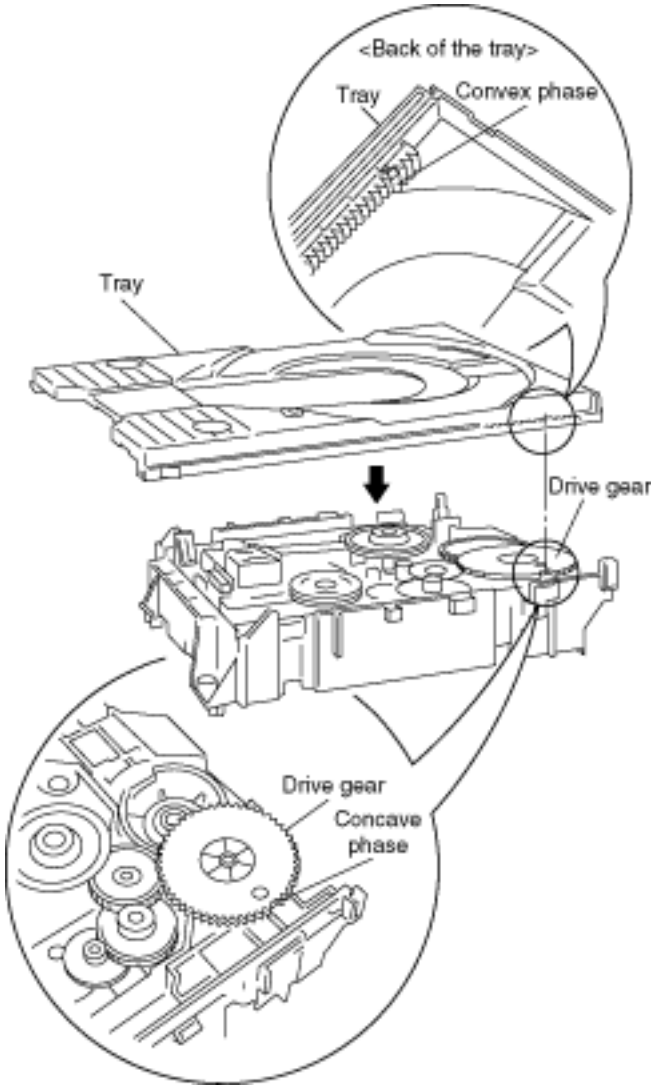
<Precautions in reassembling the tray>

•Reassemble the tray so that it is in the backmost position.

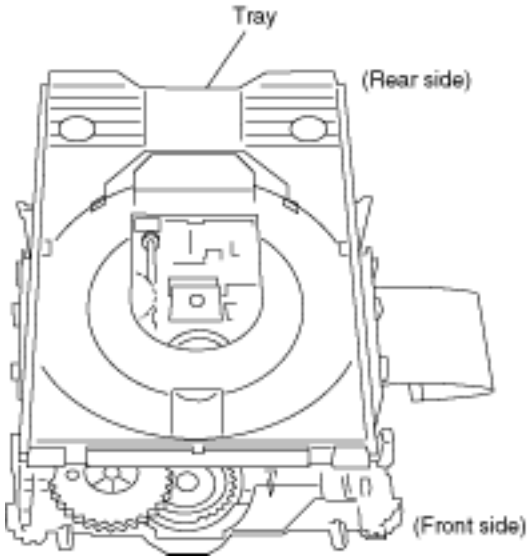
1. Turn traverse gear until cam gear leaver comes to the lever adjusting position at the end of mechanical chassis unit.



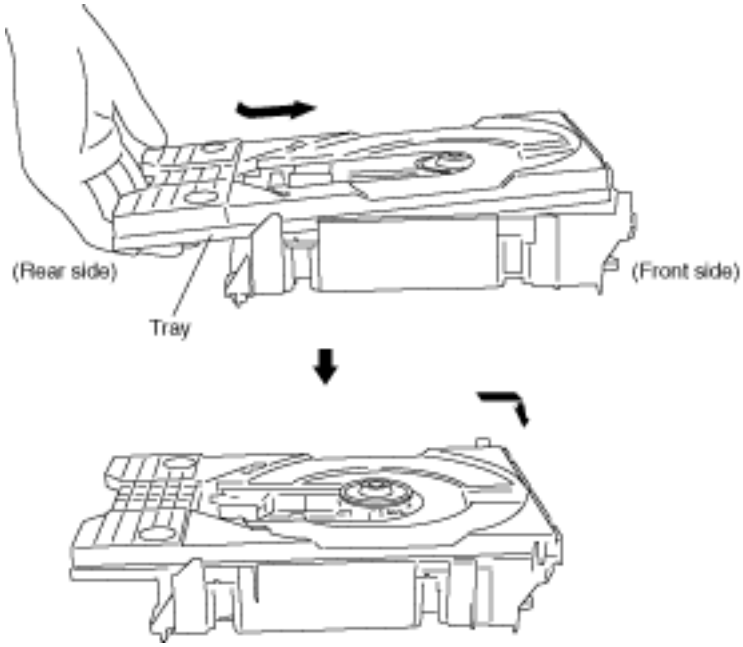
2. Check the position of convex phase on back of the tray, and that of concave phase on drive gear.



A. Place the tray on the unit from rearward.

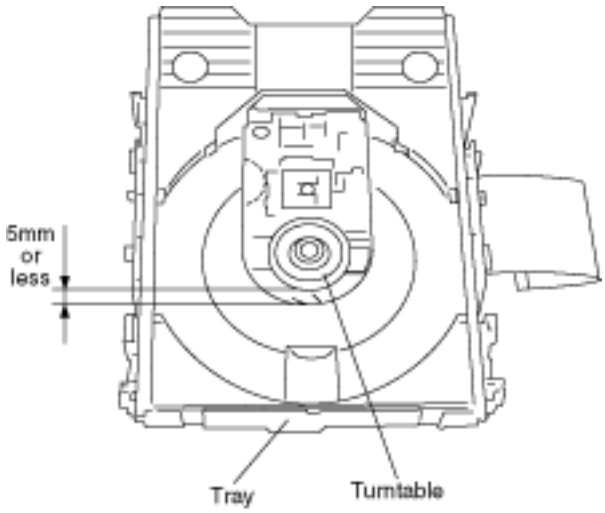


B. Inch the tray frontward until convex phase and concave phase mate.



Caution:

Make sure to mate convex phase and concave phase properly, so that the gap between turntable and tray becomes 5mm or less.



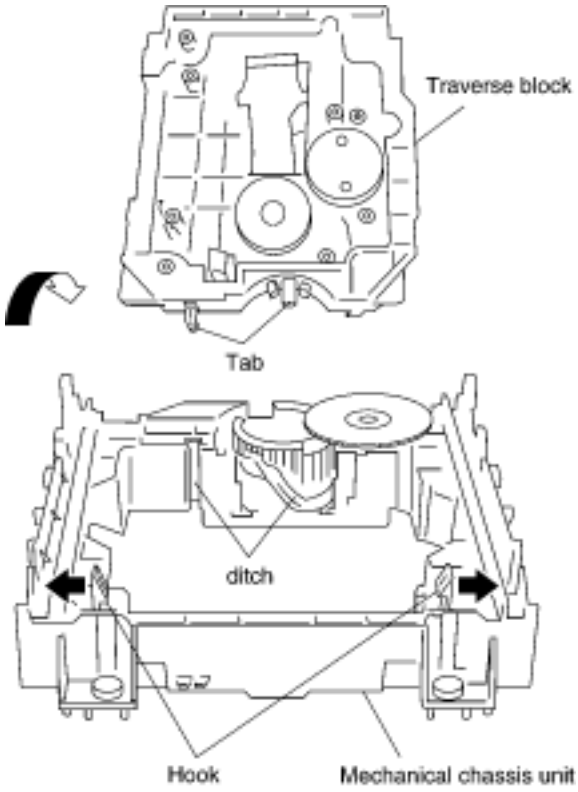
TOP PREVIOUS NEXT

8.5 Traverse Block

TOP PREVIOUS NEXT

1. Lift the traverse block while spreading the hook of the mechanical chassis unit.

2. Disengage the tabs from the holes of the mechanical chassis unit.



<Precautions in reassembling the traverse block>

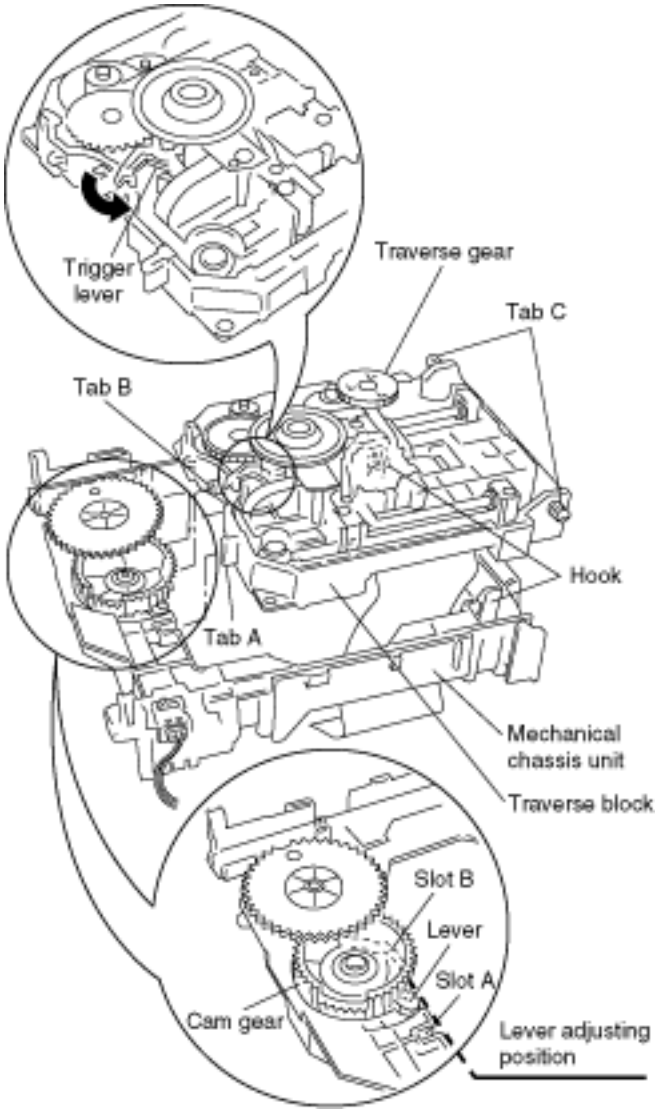
•Take the following precautions when reassembling the traverse block.

1. Turn traverse gear on the traverse block to let trigger lever turn rightward. (Front view)

2. Bring cam gear lever to the lever adjusting position at the end of mechanical chassis unit.

3. Put tabs A and B into slots A and B respectively.

   Place tabs C into hooks to mount the traverse block on mechanical chassis unit. (Slot A... Mechanical chassis unit, Slot B... Cam gear)



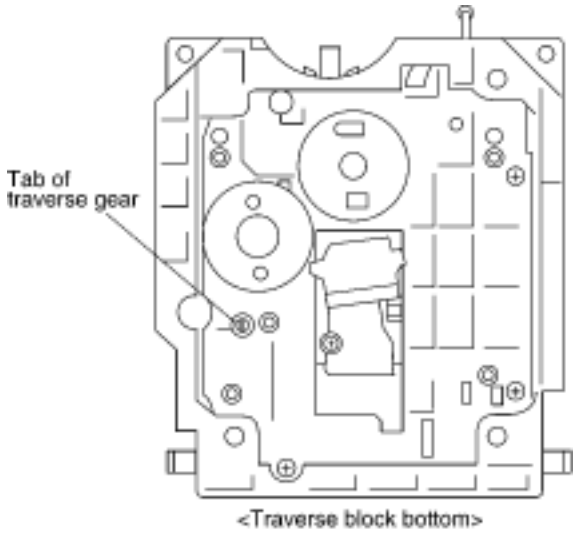
TOP PREVIOUS NEXT

8.6 Traverse Gear

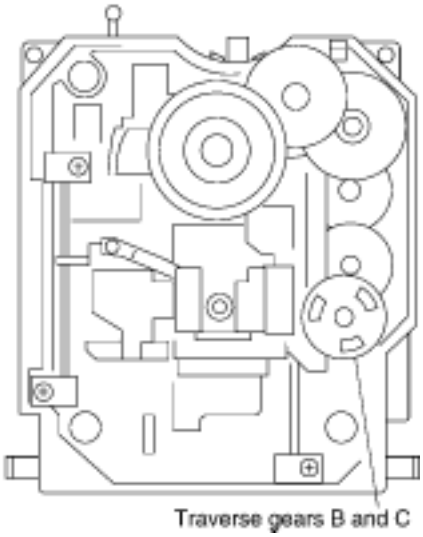
TOP PREVIOUS NEXT

1. Disengage the tabs from the traverse gear.

2. Remove the traverse gears B and C.



<Traverse block bottom>

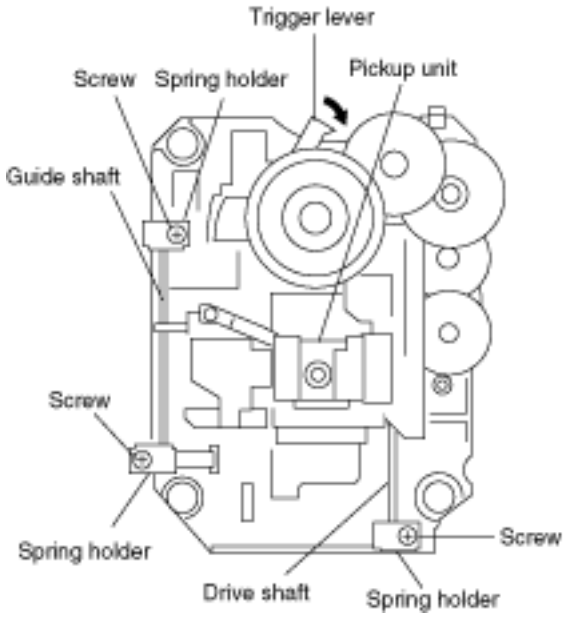


TOP PREVIOUS NEXT

8.7 Optical Pickup Unit

TOP PREVIOUS NEXT

1. Make the right turn the trigger lever.
2. Unscrew the screws.
3. Remove the spring holders and the springs.
4. Pull out the drive shaft and guide shaft.



8.7.1 Precautions in optical pickup replacement

8.7.2 Disassembling the Optical Pickup Unit

8.7.3 Cautions to Be Taken When Replacing the Optical Pickup

TOP PREVIOUS NEXT

8.7.1 Precautions in optical pickup replacement

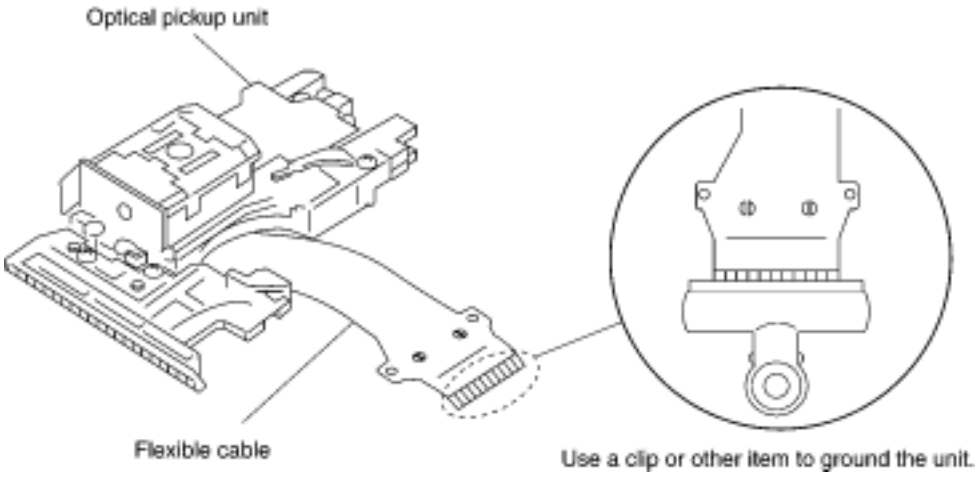
TOP PREVIOUS NEXT

The optical pickup can be damaged by static electricity from you body. Be sure to take static electricity countermeasures when working around the optical pickup. (Refer to the related page in this Manual about the countermeasures.)

1. Do not touch laser diode, actuator and their peripheries.
2. Do not use tester to check laser diode. (Laser diode can be damaged easily.)
3. The use of soldering iron with anti-static feature is recommended when providing short-circuit to laser diode or when removing it.
4. Solder the land on flexible cable of optical pickup unit.

   Caution

   - When using the soldering iron without anti-static feature, short-circuit the flexible cable terminal with a clip before short-circuiting the land.
   - After intended repair is finished, remove the solder for short-circuit of laser diode in a correct way following the procedures described in this Manual.



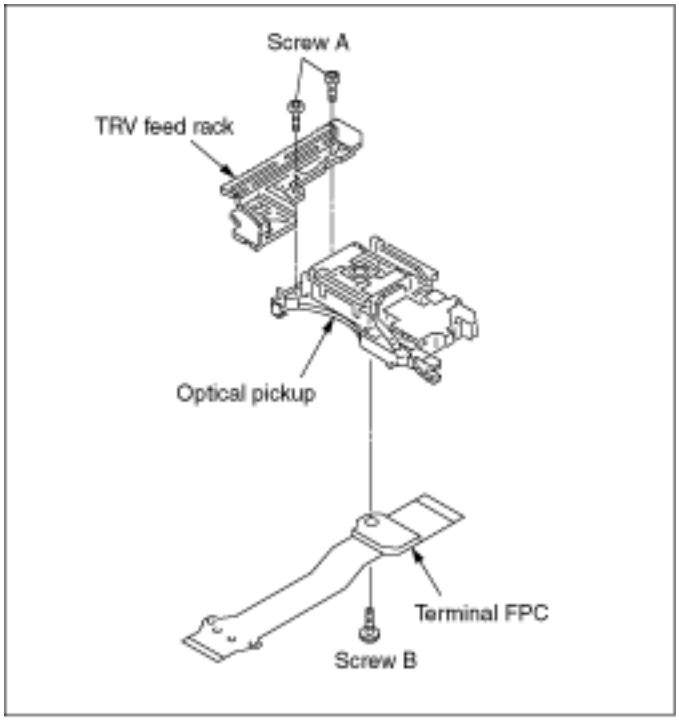
TOP PREVIOUS NEXT

8.7.2 Disassembling the Optical Pickup Unit

TOP PREVIOUS NEXT

1. Remove the 2 screws A and remove the TRV feed rack.
2. Remove the screw B and remove the Terminal FPC.
3. Remove the optical pickup.

Fig. 1



TOP PREVIOUS NEXT

8.7.3 Cautions to Be Taken When Replacing the Optical Pickup

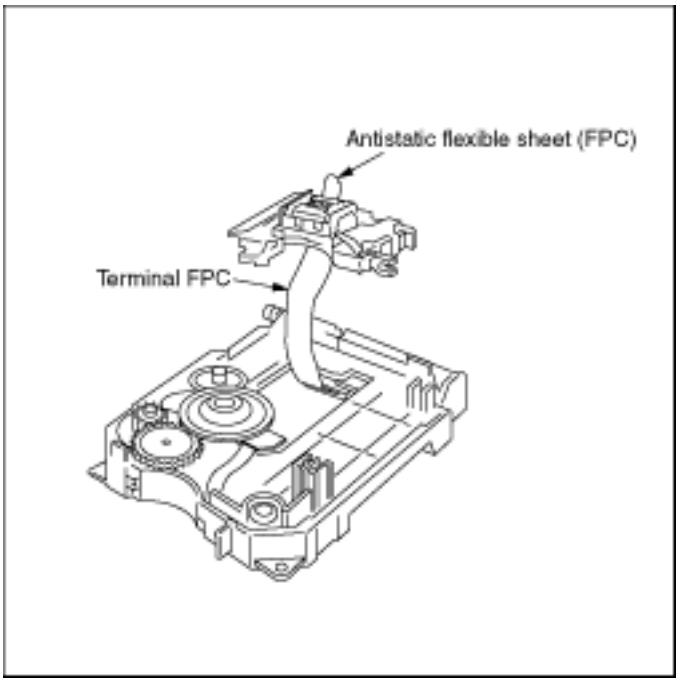
TOP PREVIOUS NEXT

- An antistatic flexible sheet (FPC) is connected with the new optical pickup.

  Replace the optical pickup according to the following procedure.

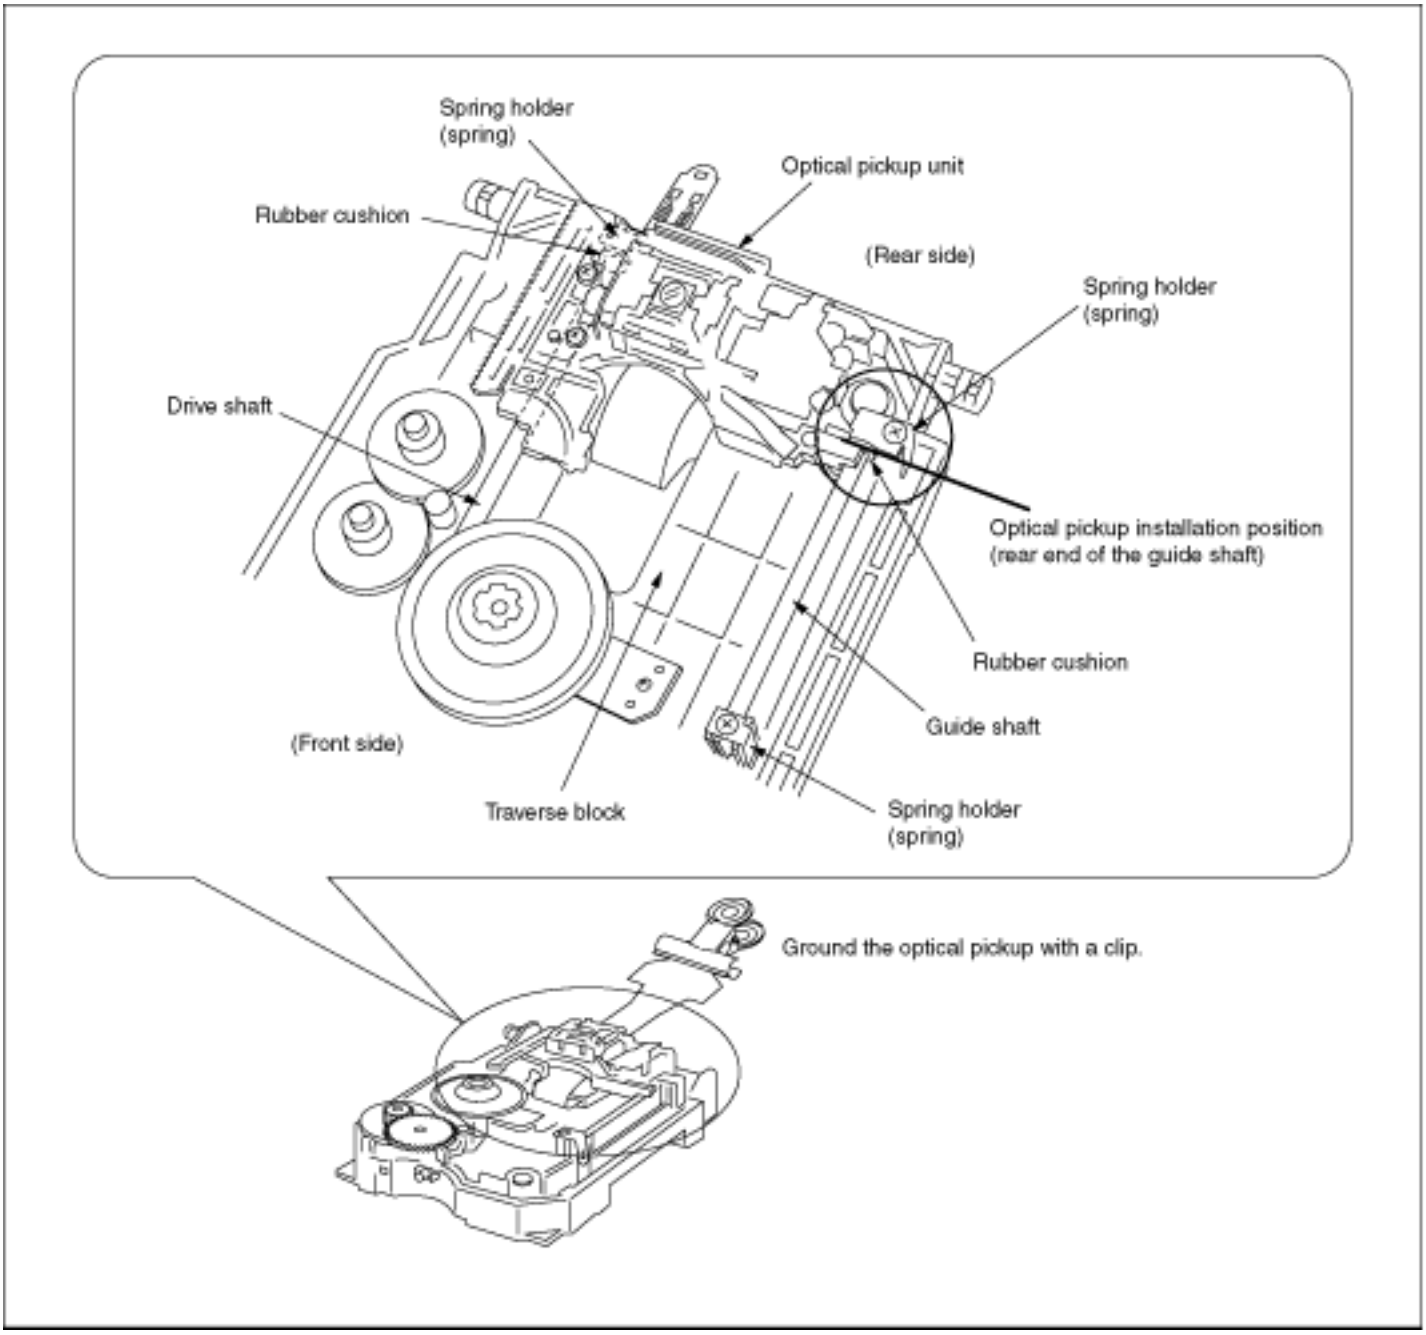
1. Install the Terminal FPC, TRV feed rack on the optical pickup. (See Fig. 1)

Fig. 2



2. Install the optical pickup unit, spring, drive shaft, guide shaft, rubber cushion, and spring holder on the traverse block.

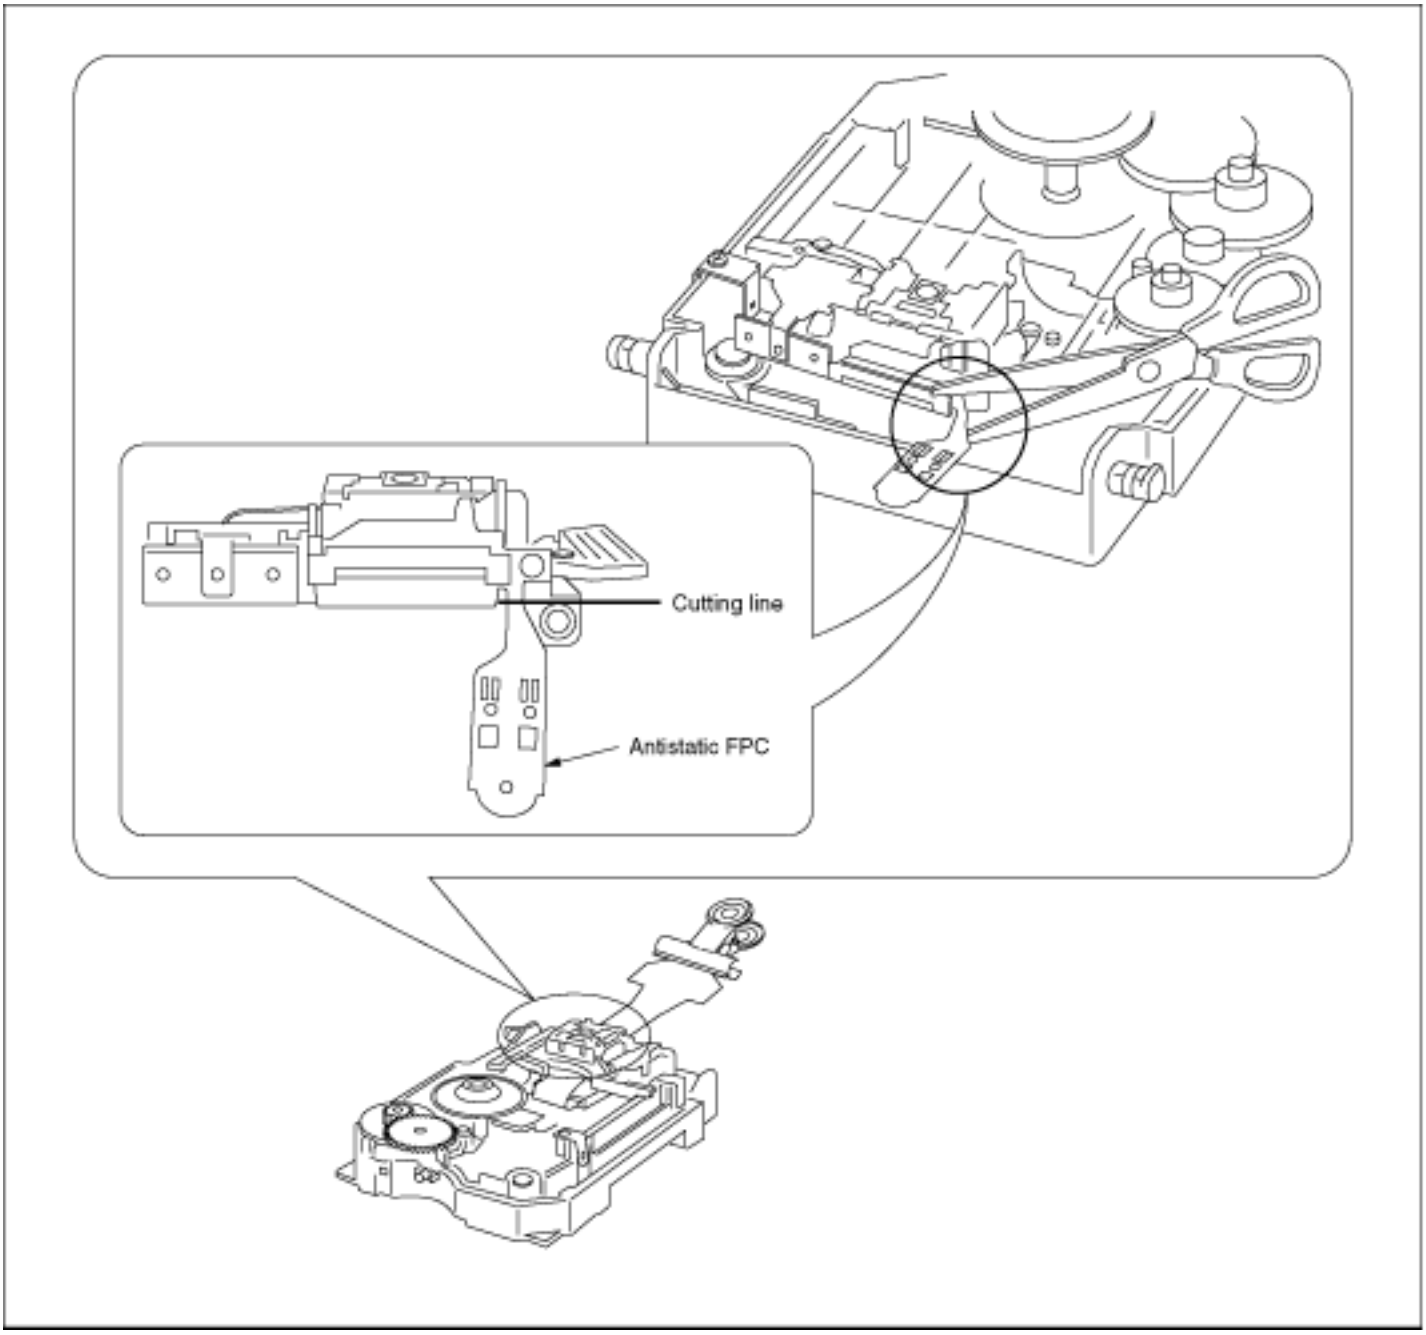
Fig. 3



Cautions to be taken when assembling the unit: Install the pickup unit so that it is located at the rear end of the guide shaft.

3. Cut the antistatic flexible sheet for the optical pickup unit.

Fig. 4



TOP PREVIOUS NEXT

8.8 Disassembling the Middle Chassis

TOP PREVIOUS NEXT

1. Remove the holder pins.
2. Remove the tabs.
3. It lifts while pulling it in the direction of the arrow.

9.1 Optical Pickup Breakdown Diagnosis

TOP PREVIOUS NEXT

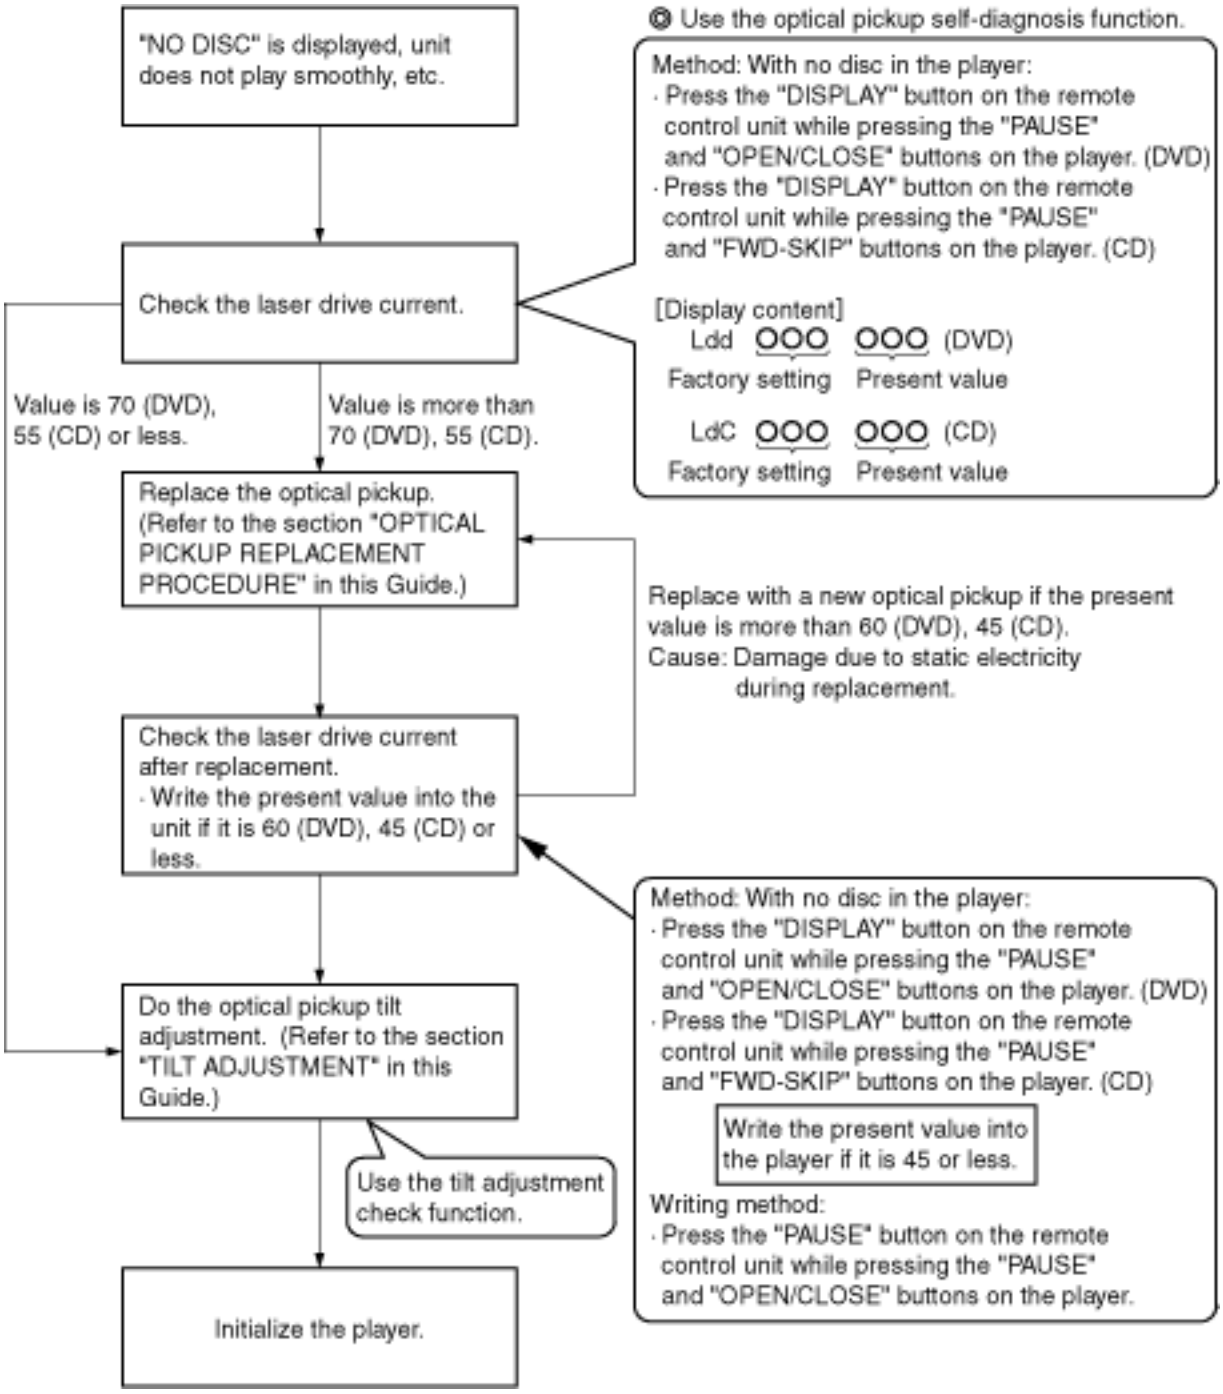
The optical pickup self-diagnosis function and tilt adjustment check function have been included in this unit. When repairing, use the following procedure for effective Self-diagnosis and tilt adjustment.Be sure to use the self-diagnosis functionbeforereplacing the optical pickup when "NO DISC" is displayed. As a guideline, you should replace the optical pickup when the value of the laser drive current is more than 55.

Note:

Press the power button to turn on the power, and check the value within three minutes before the unit warms up. (Otherwise, the result will be incorrect.)



TOP PREVIOUS NEXT

9.5 Service mode table 2

TOP PREVIOUS NEXT

Pressing various button combinations on the player and remote control unit can activate the service modes.

Item	Player mode and button combination	Function	Display	Cancellation method
Jitter check	In STOP (no disc) mode, press PAUSE and OPEN buttons on the player, and "5" button on the remote control unit.	Jitter check Jitter rate is measured and displayed. Measurement is repeatedly done in the cycle of one second. Read error counter starts from zero upon mode setting. When target block data failed to be read out, the counter advances by one increment. When the failure is caused by minor error, it may be corrected when retried to enable successful reading. In this case, the counter advances by one. When the error persists even after retry, the counter may jump by two or more.	J _xxx_yyy_zz Focus drive value Read error counter Jitter rate Jitter check mode Jitter rate is shown in decimal notation to one place of decimal. Focus drive value is shown in hexadecimal notation.	Press STOP or OPEN button.
Error code check	In STOP (no disc) mode, press PAUSE and OPEN buttons on the player, and "0" button on the remote control unit. * With pointing of cursor up and down on display, the panel controller switches serial number of history and sends out the command accordingly.	Error code check The latest error code stored in EEPROM is displayed.	Error code (play_err) is expressed in the following convention. Error code = 0 x DAXX is expressed: -> nn UXX Error code = 0 x DBXX is expressed: -> nn HXX Error code = 0 x DXXX is expressed: -> nn FXXX Error code = 0 x 0000 is expressed: -> nn F--- * "nn" denotes the serial number of history. * "xx" denotes the error code.	Cancelled automatically 5 seconds later.
Initial setting of laser drive current	In STOP (no disc) mode, press PAUSE and OPEN buttons on the player, and PAUSE button on the remote control unit.	Initial setting of laser drive currentInitial current value for each of DVD laser and CD laser is separately saved in EEPROM.	LdO_034_028 CD laser current measurement DVD laser current measurement Laser current measurement mode The value denotes the current in decimal notation. The above example shows the initial current is 34mA and 28mA for DVD laser and CD laser respectively when the laser is witched on.	Cancelled automatically 5 seconds later.
DVD laser drive current measurement	In STOP (no disc) mode, press PAUSE and OPEN buttons on the player, and DISPLAY button on the remote control unit.	DVD laser drive current measurement ·DVD laser drive current is measured and the result is displayed together with the initial value stored in EEPROM. After the measurement, DVD laser emission is kept on. It is turned off when POWER key is switched off. (It is also turned off when POWER button on the player is switched off.)	Ldd_034_032 Measured current Initial current stored in EEPROM DVD laser current measurement mode The value denotes the current in decimal notation. The above example shows the initial current is 34mA and the measured value is 32mA.	Cancelled automatically 5 seconds later.
ADSC internal RAM data check	In STOP (no disc) mode, press PAUSE and OPEN buttons on the player, and RETURN button on the remote control unit.	ADSC internal RAM data check ·ADSC internal RAM data is read out and displayed. Change the address with CLEAR key operation to show the data for 11 addresses.	A_OFA_6901 RAM data for specified address Address ADSC internal RAM data check mode The value is shown in hexadecimal notation. The above example shows the data in ADSC address DFAh is 6901h.	Press STOP or OPEN button.
Servo process display	In STOP (no disc) mode, press PAUSE and FWD-SKIP buttons on the	Servo process display The servo process from STOP to ACCESS is displayed.		Pull out the AC cord.

Servo process display	In STOP (no disc) mode, press PAUSE and FWD-SKIP buttons on the player, and "7" button on the remote control unit.	Servo process display The servo process from STOP to ACCESS is displayed.		Pull out the AC cord.
CD laser drive current measurement	In STOP (no disc) mode, press PAUSE and FWD-SKIP buttons on the player, and DISPLAY button on the remote control unit.	CD laser drive current measurement CD laser drive current is measured and the result is displayed together with the initial value stored in EEPROM. After the measurement, CD laser emission is kept on. It is turned off when POWER key is switched off. (It is also turned off when POWER button on the player is switched off.)	LdC_028_026 Measured current Initial current stored in EEPROM CD laser current measurement mode The value denotes the current in decimal notation. The above example shows the initial current is 28mA and the measured value is 26mA.	Cancelled automatically 5 seconds later.

Item	Player mode and button combination	Function	Display	Cancellation method
Version display	In STOP (no disc) mode, press PAUSE and OPEN buttons on the player, and "7" button on the remote control unit.	Version display	srrr_xxyzzz System controller release number System controller model number System controller generation Panel controller release number Panel controller model number	Cancelled automatically 5 seconds later.
Lighting of display tube	In STOP (no disc) mode, press PAUSE and OPEN buttons on the player, and "9" button on the remote control unit.	Lighitng of display tube		Repeat the same operation.
Dealer's lock	In STOP (no disc) mode, press STOP button on the player, and POWER button on the remote control unit for 1 second or longer.	Dealer's lock The lock is switched ON or OFF. When dealer's lock is ON, it prohibits switching off of the secondary power and tray opening. When the lock is switched, its ON/OFF status is stored in EEPROM.	· "LOCK" sign appears when dealer's lock is switched on, or when secondary power key or tray opening key is pressed while the lock is on. · "UNLOCK" sign appears when dealer's lock is switched off.	Repeat the same operation.
Initialization	In STOP (no disc) mode, press PAUSE, BWD-SKIP and OPEN buttons on the player for 3 seconds or longer.	Initialization User settings are cancelled and player is initialized to factory setting.	"INIT"	
Region display	In STOP (no disc) mode, press PAUSE and OPEN buttons on the player, and "6" button on the remote control unit.	Region display	x_y-y_zzz Panel controller jumper information N: NTSC / 6: PAL60 N: noPAL / P: PAL Region No.	Cancelled automatically 5 seconds later.

Item	Player mode and button combination	Function	Display	Cancellation method
Timer 1 check	In STOP (no disc) mode, press PAUSE and FWD-SKIP buttons on the player, and "5" button on the remote control unit.	Timer 1 check Laser operation timer Operation time is measured separately for DVD laser and CD laser.	t1_1234_5678 Shown to the left is DVD laser time, and to the right CD laser time. Time is shown in 4 digits of decimal notation in a unit of 10 hours. "0000" will follow "9999".	Cancelled automatically 5 seconds later.
Timer 1 reset	While displaying Timer 1 data, press STOP and FWD-SKIP buttons on the player, and "5" button on the remote control unit.	Timer 1 reset Laser operation timer Operation time of both DVD laser and CD laser is reset all at once.	t1_0000_0000	Cancelled automatically 5 seconds later.
Timer 2 check	In STOP (no disc) mode, press PAUSE and FWD-SKIP buttons on the player, and "6" button on the remote control unit.	Timer 2 check Spindle motor operation timer	t2_12345 Time is shown in 5 digits of decimal notation in a unit of 10 hours. "00000" will follow "99999".	Cancelled automatically 5 seconds later.
Timer 2 reset	While displaying Timer 2 data, press STOP and FWD-SKIP buttons on the player and "6" button on the remote control unit.	Timer 2 reset Spindle motor operation timer	t2_00000	Cancelled automatically 5 seconds later.

TOP PREVIOUS NEXT

9.6 Sales demonstration lock function

TOP PREVIOUS NEXT

This function prevents discs from being lost when the unit is used for sales demonstrations by disabling the disc eject function. "LOCK" is displayed on the unit, and ordinary operation is disabled.

TOP PREVIOUS NEXT

9.6.1 Setting

TOP PREVIOUS NEXT

The sales demonstration lock is set by simultaneously pressing STOP button on the player and POWER button on the remote control unit for 1 second or longer.

TOP PREVIOUS NEXT

9.6.2 Cancellation

TOP PREVIOUS NEXT

The lock can be cancelled by the same procedure as used in setting. ("UNLOCK" is displayed on cancellation. Disconnecting the power cable from power outlet does not cancel the lock.)

TOP PREVIOUS NEXT

9.7 Handling After Completing Repairs

TOP PREVIOUS NEXT

Use the following procedure after completing repairs.

TOP PREVIOUS NEXT

9.7.1 Method

TOP PREVIOUS NEXT

Confirm that the power is turned on:

1. Press the "OPEN/CLOSE" button to close the tray.
2. Press the "POWER" button to turn off the power.
3. Disconnect the power plug from the outlet.

TOP PREVIOUS NEXT

9.7.2 Precautions

TOP PREVIOUS NEXT

Do not disconnect the power plug from the outlet with the tray still open, then close the tray manually.

TOP PREVIOUS NEXT

10 Servicw Precautions

TOP PREVIOUS NEXT

10.1 Recovery after the dvd player is repaired

10.2 Firmware version-up of the DVD player

TOP PREVIOUS NEXT

10.1 Recovery after the dvd player is repaired

TOP PREVIOUS NEXT

- When FROM or module P.C.B. is replaced, carry out the recovery processing to optimize the drive.

  Playback the recovery disk to process the recovery automatically.

- Recovery disc (Product number: RFKZD03R004)

- Performing recovery

  1. Load the recovery disc RFKZD03R004 on to the player and run it.

  2. Recovery is performed automatically. When it is finished, a message appears on the screen.

  3. Remove the recovery disc.

  4. Turn off the power.

Note:

This unit requires no initialization process carried out after the traditional DVD players were repaired.

When the recovery measures are taken, the customer setting will return to the factory setting as same as the procedure described in item of "Initialization" in 9.5. is carried out. Write down the contents of the setting before recovery processing,and resetthe player.

TOP PREVIOUS NEXT

10.2 Firmware version-up of the DVD player

TOP PREVIOUS NEXT

- The firmware of the DVD player may be renewed to improve the quality including operationability and playerbility to the substandard discs.processing to optimize the drive.

  The recovery disc has also firmware version-up.

- After version-up, recovery processing is executed automatically.

- Part number of the recovery disc for version-up will be noticed when it is supplied.

- Updating firmware

  1. Load the recovery disc that is supplied to the player and run it.

  2. Firmware version of the player is automatically checked. Appropriate message appears whenever necessary.

  3. Using remote controller´s cursor key, select whether version updating is to be done or not. (Selection of Yes/No)

  4. a. If Yes is selected, version updating is performed.

     b. If No is selected, only recovery is performed.

  5. a. When updating is finished, remove the disc according to the message appearing on the screen.

     b. Remove the disc according to the message appearing on the screen.

  6. Turn off the power.

Note:

If the AC power supply is shut out during version-up due to a power failure, the version-up is improperly carried out.

In such a case, replace the FROM and carry out the version-up again.

TOP PREVIOUS NEXT

11.2 Important points in adjustment

TOP PREVIOUS NEXT

TOP PREVIOUS NEXT

11.2.1 Important points in optical adjustment

TOP PREVIOUS NEXT

- Before starting optical adjustment, be sure to take anti-static measures.
- Optical pickup tilt adjustment is needed after replacement of the following components.

1. Optical pickup unit
2. Spindle motor unit
3. Optical pickup peripheral parts (such as rail)

Notes

Adjustment is generally unnecessary after replacing other parts of the traverse unit. However, make adjustment if there is a noticeable degradation in picture quality. Optical adjustments cannot be made inside the optical pickup. Adjustment isgenerally unnecessaryafter replacing the traverse unit.

TOP PREVIOUS NEXT

11.2.2 Important points in electrical adjustment

TOP PREVIOUS NEXT

- Follow the adjustment procedures described in this Manual.

TOP PREVIOUS NEXT

11.3 Storing and Handling Test Discs

TOP PREVIOUS NEXT

- Surface precision is vital for DVD test discs. Be sure to store and handle them carefully.

1. Do not place discs directly onto the workbench, etc., after use.

2. Handle discs carefully in order to maintain their flatness. Place them into their case after use and store them vertically. Store discs in a cool place where they are not exposed to direct sunlight or air from air conditioners.

3. Accurate adjustment will not be possible if the disc is warped when placed on a surface made of glass, etc. If this happens, use a new test disc to make optical adjustments.

4. If adjustment is done using a warped disc, the adjustment will be incorrect and some discs will not be playable.

TOP PREVIOUS NEXT

11.4 Optical adjustment

TOP PREVIOUS NEXT

11.4.1 Optical pickup tilt adjustment

11.4.1.1 Adjustment procedure

11.4.1.2 Important points

11.4.1.3 Check after adjustment

11.4.1.4 Procedure for screw lock

TOP PREVIOUS NEXT

11.4.1 Optical pickup tilt adjustment

TOP PREVIOUS NEXT

Measurement point	Adjustment point	Mode	Disc
	Tangential adjustment screw Tilt adjustment screw	T01 (inner periphery) play T43 (outer periphery) play	DVDR-S15 or DVDT-S01
Measuring equipment		Adjustment value	
None (Main unit display for servicing is used.)		Adjust to the minimum jitter value.	

TOP PREVIOUS NEXT

11.4.1.1 Adjustment procedure

TOP PREVIOUS NEXT

1. While pressing PAUSE and OPEN/CLOSE buttons on the main unit, press "5" on the remote control unit.

2. Confirm that "J_xxx_yyy_zz" is shown on the front display.

   For your information:

   "yyy" and "zz" shown to the right have nothing to do with the jitter value. "yyy" is the error counter, while "zz" is the focus drive value.

   Note:

   Jitter value appears on the front display.

3. Play test disc T01 (inner periphery).

4. Adjust tangential adjustment screw so that the jitter value is minimized.

5. Play test disc T43 (outer periphery).

6. Adjust tilt adjustment screw 1 so that the jitter value is minimized.

7. Play test disc T43 (outer periphery).

8. Adjust tilt adjustment screw 2 so that the jitter value is minimized.

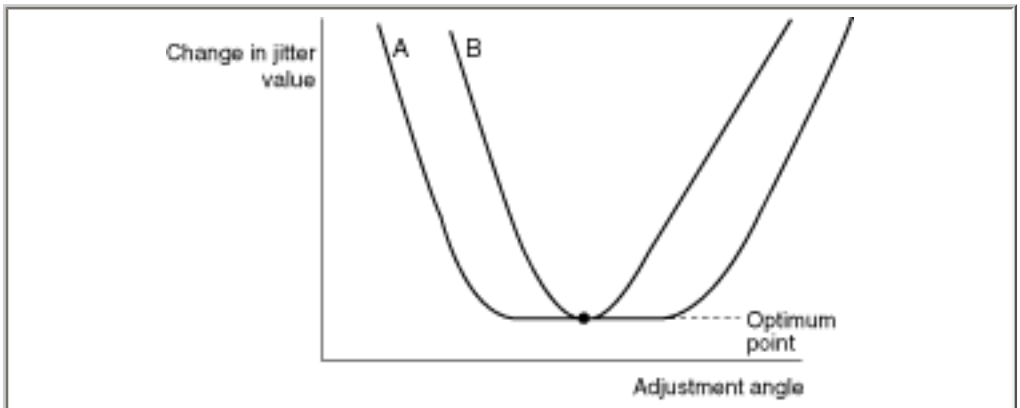
9. Repeat adjusting tilt adjustment screws 1 and 2 alternately until the jitter value is minimized.

TOP PREVIOUS NEXT

11.4.1.2 Important points

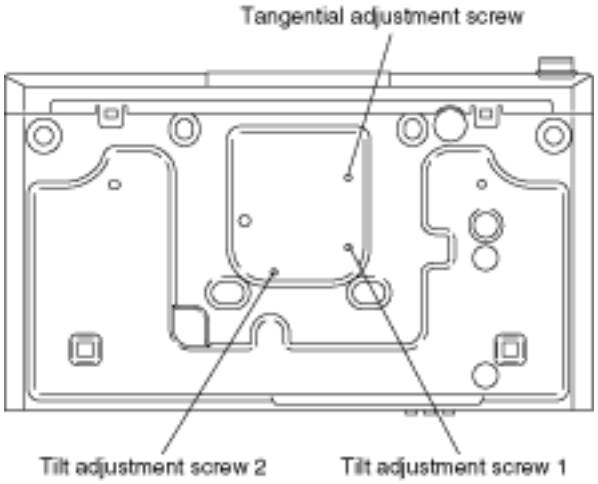
TOP PREVIOUS NEXT

1. Make tangential adjustment first, and then make tilt adjustment.
2. Repeat adjusting two or three times to find the optimum point.
3. Finish the procedure with tilt adjustment.



Jitter value depends on the model:

1. If the jitter value changes like B, the optimum point is easy to find.
2. If the jitter value changes like A, set the optimum point near the middle.



TOP PREVIOUS NEXT

11.4.1.3 Check after adjustment

TOP PREVIOUS NEXT

Play test disc or any other disc to make sure there is no picture degradation in the inner, middle and outer peripheries, and no audio skipping. After adjustment is finished, lock each adjustment screw in position using screw lock.

TOP PREVIOUS NEXT

11.4.1.4 Procedure for screw lock

TOP PREVIOUS NEXT

1. After adjustment, remove top cover, tray, clamper base and traverse unit in this sequence.
2. Lay the traverse unit upside down, and fix adjustment screw with screw lock.
3. After fixing, reassemble traverse unit, clamper base, tray and top cover.

INTERCONNECTION SCHEMATIC DIAGRAM

15.2 SCHEMATIC DIAGRAM NOTES

TOP PREVIOUS NEXT

This schematic diagram may be modified at any time with the development of new technology.

Important safety notice:

Components identified by ⚠ mark have special characteristics important for safety.

Furthermore, special parts which have purpose of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used. When replacing any of components, be sure to use only manufacture´s specified parts showninthepartslist.

Important safety notice:

There are special components used in this equipment which are important for safety.

These parts are marked by ⚠ in the schematic diagrams. It is essential that these critical parts should be replaced with manufacturer’s specified parts to prevent shock, fire, or other hazards. Do not modify the original designwithoutpermission of manufacturer.

Caution!

IC and LSI are sensitive to static electricity.

Secondary trouble can be prevented by taking care during repair.

Cover the parts boxes made of plastics with aluminum foil.

Ground the soldering iron.

Put a conductive mat on the work table.

Do not touch the legs of IC or LSI with the fingers directly.

19 REPLACEMENT PARTS LIST

TOP PREVIOUS NEXT

Notes:

*Important safety notice:

Components identified by ⚠ mark have special characteristics important for safety.

Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used.

When replacing any of components, be sure to use only manufacture’s specified parts shown in the parts list.

*Warning: This product uses a laser diode. Refer to caution statements.

*Capacity values are in microfarads (μ F) unless specified otherwise, P=Pico-farads (pF), F=Farads (F).

*Resistance values are in ohms, unless specified otherwise, 1K=1,000 (OHM), 1M=1,000k (OHM).

*The marking (RTL) indicates the retention time is limited for this item. After the discontinuation of this assembly in production, it will no longer be available.

*“<IA> - <IF>”, marks in Remarks indicate languages of instruction manuals. [<IA>: English, <IB>: English, <IC>: Spanish, Portuguese, <ID>:Chinese, <IE>:Korean, <IF>: Arabic.]

*All parts are supplied by S.P.C..

15.2. SCHEMATIC DIAGRAM NOTES

This schematic diagram may be modified at any time with the development of new technology.

Important safety notice:

Components identified by ⚠ mark have special characteristics important for safety.

Furthermore, special parts which have purpose of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used. When replacing any of components, be sure to use only manufacture´s specified parts shown in theparts list.

Important safety notice:

There are special components used in this equipment which are important for safety.

These parts are marked by ⚠ in the schematic diagrams. It is essential that these critical parts should be replaced with manufacturer's specified parts to prevent shock, fire, or other hazards. Do not modify the original design without permission of manufacturer.

Caution!

IC and LSI are sensitive to static electricity.

Secondary trouble can be prevented by taking care during repair.

Cover the parts boxes made of plastics with aluminum foil.

Ground the soldering iron.

Put a conductive mat on the work table.

Do not touch the legs of IC or LSI with the fingers directly.
